Fuji Bank's role in **US** bond venture limited

By David Lascelles in London

KLEINWORT BENSON, the UK merchant bank, and Fuji Bank, Japan's third largest bank, are completing plans for a joint dealership in the US Treasury

bond market.

However, Fuji Bank's participation is being kept to 24.9 per cent to avoid friction between the US and Japan just as President Ronald Reagan and Congress prepare to do battle over the Trade Bill.

The bill, which Mr Reagan has threatened to veto, carries an amendment to stop foreign institutions entering the Trea-sury market as primary deal-ers unless their country gives reciprocal access to US banks and brokerage houses. The amendment was tabled in response to mounting concern over the number of Japanese dealers who were receiving recognition from the Federal Reserve at a time when US houses were having difficulty getting into Japan. So far, four have been recognised, and two applications are pending.

Primary dealers have official status in the market, acting as buyers and distributors of new issues of Treasury bonds and notes. As such they play a key role in the financing of the US budget deficit.
The Federal Reserve Bank of

New York, which regulates the US Treasury market, is understood to have made clear the political sensitivities of the Kleinwort-Fuji deal to the two partners, and to have suggested that Fuji play a minority role.

Kleinwort Benson already owns a primary Treasury dealer: Chicago-based Kleinwort Benson Government Securities which it bought in 1984. The intention is that Fuji will contribute additional cap tal to the company and bring it new sources of business.

KBGS ranks about 20th in size among the Treasury mar-ket's 42 dealers, and Kleinwort is keen to move it into the top dozen where the bulk of the market's business is concentrated. The company, which is capitalised at \$23m, made a small loss last year but is said to be operating profitably. Stefan Wagstyl adds from Tokyo: Yamaichi Securities is

also having problems gaining access to the US Treasury mar-ket. Yamaichi, which has built a US government bond dealing operation from scratch and has Continued on Page 26

BY SIMON HOLBERTON IN LONDON

THE POUND rose sharply in foreign exchange markets yesterday despite two attempts by the Bank of England to stem the curren-

At the close in London sterling was 3½ pfennigs and 1½ cents higher at DM3.1625 and \$1.8795 than its Friday closing levels. In New York it closed at \$1.8815 compared with \$1.8610 on Friday.
The Bank's trade-weighted sterling index stood at 78.5, its highest level since January 1986.

The currency's rise was partly due to technical factors and partly to do with a bullish assessment of the pound by Goldman Sachs, the US securities house. The surge in sterling, however, rates higher and the pound served to underline the UK Gov-weaker than its current level ernment's current dilemma over

CHANGE THE

DESTINY OF

How Mitterrand did it: A consensus around Editorial comment: The price of a single

By David Marsh in Bons

THE West German opposition Social Democratic Party (SPD) will look for alliances with rightwin fook for aniances with right-wing governed states to try to block government policies in the Bundesrat, the upper house of Parliament, Mr Hans-Jochen Vogel, the SPD leader, said yes-

Mr Vogel was speaking in the wake of the SPD's capture of the northern state (Land) of Schleswig-Holstein in Sunday's elecwighthister in Sinitary selection. The landslide victory leaves the Social Democrats and Chancellor Helmut Kohl's Christian Democrats (CDI) with an equal number of seats in the Landelected Bundesrat, which has a veto over important legislation, including text leave. including tax law.

Mr Vogel, holding a celebrat-

ory press conference with a jubi-lant Mr Björn Engholm, the Prime Minister-designate of the state, said it would be up to peo-ple like Mr Franz Josef Strauss, the Bavarian Prime Minister, to come up with "sensible suggestions" in the Upper House capable of finding SPD support.

Mr Strauss, leader of Mr Kohl's restive coalition partner, the Christian Social Union, now caracter of the Strauss of the Straus

ries the effective casting vote in the Bundesrat. However, Mr Kohi, at a separate press confer-ence yesterday, played down any threat to his government of the new voting structure in the Bundesrat.

Mr Engholm meanwhile pledged a thorough examination of safety standards at the state's three nuclear power stations ahead of a move to try to close them down. This is in line with the SPD's policy of seeking clo-sure of West German nuclear plants over the next 10 years.

Mr Engholm, who will take up office next month as the head of the first SPD-led government in the first SFD-led government in the state for 38 years, promised to bring in outside experts to help boost Schleswig-Holstein's flagging fortunes. As well as a think tank to study ways of giving the state an "ecological and economic renewal", Mr Engholm said he would also be bringing in a form of concerted action between union and employers.

between union and employers.

Mr Engholm said the SPD
would pay closer attention to the needs of the electorate, who had been treated with "lack of feel-ing" by the previous Christian Democrat-run administration. He said the Kiel state parliament

would be given greater powers to check the state government.
The Christian Democrats lost 9.3 points, to 33.3 per cent of the vote, compared with the last elections in September, failing to win a single electoral constituency, with the SPD gaining 9.6 points

LARGE CABINET TRIES TO ACCOMMODATE WIDE PARTY AND LINGUISTIC INTERESTS

Martens return fails to rouse Belgians

the country's new Premier, and 31 other ministers and secretaries of state were duly sworn in by

King Bandouin.

While most diplomats and Eurocrats in Brussels took the day off to celebrate the birthday of one of the founding fathers of the European Community, Belgians were not noticeably rejoining that their near 150-day caretaker Government had formally come to an and

taker Government had formally come to an end.

The Brussels Bourse, which earlier in the year had leapt and danced to the tune of the Italian husinessman Mr Carlo de Benedetti, betrayed barely a flicker of interest in the successful formation of a new coalition and actually finished the day a shade off Friday's close. Front pages of the local newspapers seemed at least as preoccupied by the outcome of the election in neighbouring France.

Even Mr Martens - back for the eighth time as Prime Ministe after most commentators had written him off - spent much of the time at his first news conference apologetically explaining why his new cabinet is initially so large. It will shrink, he pointed out, once the promised

THE MOOD in Belgium was low devolution is complete and direct key and far from triumphal yesterday as Mr Wilfried Martens, new Council of the Brussels

Notwithstanding its considerable size – the consequence of having to accommodate the ambi-tions of five centre-left parties and to attempt to preserve the delicate linguisitic balance between Flemish and Francophone - no room could be found for Mr Mark Eyskens, Finance Minister in the previous Government and a former Prime Minis-ter in 1981. His post goes to Mr Philippe Maystadt, the former Economics Minister and a rising star of the French-speaking Christian Democrat party (PSC).

Mr Maystadt, however, had been tipped as a possible vice-Prime Minister for the PSC, but that privilege goes to Mr Mel-chior Wathelet, the new Minister of Justice and the Middle Classes who has deservedly earned a name for himself as a dynamic and far sighted president of the Walloon Regional Executive.

Mr Martens leaves the palace after being sworn-in

ing Socialists (Economic affairs Two surprises in the list were and far sighted president of the Walloon Regional Executive.

The other vice-Prime Ministers are Mr Philippe Moureaux for the French-speaking Socialists (PS) whose portfolio includes responsibility for the Brussels region and institutional reforms, Mr Willy Claes of the Flemish-speak.

Soviet 'opposition' party members held

SOVIET POLICE yesterday detained six political dissi-dents involved in an attempt to set up a new political party, but failed to prevent a meeting to adopt its manifesto.

They also forced participants from Soviet cities outside Moscow to return home before the end of the three-day con-ference, held at a variety of unofficial venues, to establish what is to be called the Democratic Union.

Some 70 people managed to meet for half an hour yester-day to adopt their manifesto, after the security police prevented them from getting to their original meeting place – the offices of the dissident journal Glasnost - in the countryside outside Moscow.

The editor of Glasnost, Mr Sergei Grigoryants, and five of his colleagues, were detained.

Further participants were reported to have been detained last night, but it was not clear if any would be charged with serious offences.

The new organisation - a political party in all but name, although the ruling Commu-nist party is the only one recognised by the constitution is pledged to "economic and spiritual pluralism, a multiparty system, a legal opposition press and independent trade unions," according to its founding charter. "We define the contents of

our activity as political opposi-tion to the present order," it says. In itself the fledgiing party does not represent any serious challenge to the overwhelming authority of the Soviet regime, but it does none the less mean a political embarrassment for Mr Mikhail Gorbachev, the

Soviet leader.

It clearly falls well causide those informal groups within the ruling party which may be tolerated as part of Mr Gorbachev's political and economic to a task reforms, and amounts to a test of the "socialist pluralism" which he has called for.

 Soviet farmers attacked
Mr Gorbachev's economic
reforms yesterday for doing
little to ease habitual shortages in food and fooder, Reuter water farmers.

**Tenness for the control of the contro ter reports from Moscow.

In letters to Pravda, the Communist party newspaper, one farmer said shops were no better stocked than before perestroika began three years ago. Another said the private farm holdings that the Kremin wants to encourage to boost food production are being eliminated because there is no fodder for their cattle.

Ozal dodges plea for journalists

TURKEY'S Prime Minister, Mr
Turgut Czal, yesterday aldestep
ped pleas for an amnesty for
imprisoned fournalists at the
opening in Estanbul of the Strik
General Assembly of the International Press Institute. Upwards of
46 are in jail on various sentences for their writings.

The pleas were made by Mr
Peter Gelliner and Mr Jusa Lats
Celaim, director and chainsen
respectively of the IPI.

Mr Galliner asked the Premier
to ensure that other restrictions
on press freedom were abolished.
He also urged the Government to
refrain from using comounic pres-TURKEY'S Prime Minister, Mr

refrain from using economic free-sures in an attempt to influence publications editorial content.

publications editorial content.

Mr Ozal met this halfway,
pointing to Turkey's democratic
progress coupled with its connomic advancement, which ha
described as a rare achievement.
On human rights, he invited
investigation from abroad into

allegations of torture.

However, he pointed out that the press had a role and respensibilities in society, as did the legislature and executive, and should not exceed it. He also called for balanced coverage, saying that the press could be used to further the interests of of its owners — a clear reference to his recent clashes with the press.

Olli Virtanen in Helsinki reports on a change in a policy of neutrality towards Western Europe

Finland seeks entry into Council of Europe

FINLAND'S decision at the end of April to seek membership of the Council of Europe has removed one of its arguments for the uniqueness of its foreign pol-

The country's neutrality policy is now able to accommodate the membership but on the domestic front Finland will have a long way to go before its human rights laws are compatible with the

Council's requirements.

As the only large West European country outside the Council of Europe (the other non-members are Andorra, Monaco, San Marino and Vatican), Finland's position has been a subject of awkward questions abroad and embarrasment at home. Historically Finland has abstained because of the Council's original role as a "cold-war

organ" with overly anxious criticism of the human rights in the Soviet bloc, as many Finnish poli-

In economic terms the trend is strongly urged the newly-formed decision to seek closer ties with ing to the law any Finnish man clear. During the 1980s Finnish Government to apply for the companies have made dozens of acquisitions in Western Europe.

The timing turned out to be welcomes the move. At a time must take compulsory public services. The continent's share of Finland's external trade has grown. EC and Efta countries now ters for the first time after 21 with the community as a whole account for two thirds of Fin-

land's total exports.

On the political front Finland's traditional solution is the highwire act, balancing between East and West. This was apparent when the special Efta agreement in the 1960s was balanced with a similar document with Comecon, the Soviet block trading pact. In the case of the Council of

Europe no such counter agreement was possible. But then, times have changed. Moscow itself has made inroads to Stras-bourg. And Finland has been an active observer member of the Council, taking part in a number Despite the favourable develop-

ments the decision was far from easy for the Government. The

Paul Betts outlines the likely new shape of the French political landscape • George Graham joins celebrating foreigners in Paris

Rocard hoists the standard of social democracy again

IF, AS widely expected, Mr Mitterrand changed the obvious Mr Mitterrand would run party Michael Rocard is chosen by President France's next Prime Minister, it when Mr Mitterrand changed the obvious Mr Mitterrand would run party voting system to proportional again. He also railied sportingly to Mr Committee again. He also railied sportingly to Mr Committee again. At the time Mr Rocard claimed Mitterrand's cause this year And hardly will complete the President's conversion to a centrist form of

social democracy.

Even before Mr. Mitterrand's landslide victory on Sunday, the name of Mr. Rocard, his eternal challenger in the Socialist party, thanenger in the Socialist party, was regularly mentioned as a possible Premier, together with that of Mr Pierre Beregovoy, the former Socialist Finance Minister, and Mr Jacques Delors, president of the European Commis-

But by Sunday night, Mr Rocard was emerging as the clear favourite. A public opinion poll published yesterday suggested that he was by far the public's most popular choice. However, whether it would represent the ultimate accolade for Mr Mitterand's long-standing challenger, or poisoned chalice to undermine his political career remains to be

In any case, whatever happens in the next few days, he will undoubtedly play a key role in pointing French politics towards the centre. Mr Rocard, for years the country's most popular Socialist leader although proba-bly one of the most unpopular within his own party, has now remerged from the shadows. He is likely to seize on the opportunity of Mr Mitterrand's success and apparent political conversion to try to advance his ambitions of transforming the Socialist party into a modern social democratic

The irony of the situation is that Mr Mitterrand has been his ambiguous commitment to steadily moving towards Mr socialism, for party hardliners at Rocard's social democratic posi- least, made him an unpopular figtion, combining economic prag-matism and realism with what Mr Rocard likes to call "a strong

sense of humanity". Barely seven years ago, Mr Rocard, who disapproved of the left's original programme of nationalisations among several other key Socialist policies, had attacked Mr Mitterrand for his "archaic form of socialism". After maintaining a dignified political silence and adopting a technologies. cratic approach as the Socialist Agricultural Minister, when he was especially popular in Brus-sels, Mr Rocard resigned from the Socialist Government in 1985

a future bid for the Elysee. For all these reasons. Mr Rocard may be the best man to lead Mr Mitterrand's first Government into legislative elections where the President will hope to secure an outright majority the National Assembly. But it should not come as a big surprise, even for Mr Rocard if he general election.

There could be all sorts of motives for Mr Mitterrand pick-ing Mr Rocard as Prime Minister. In the end, however, whether Mr Rocard is chosen or not (Mr Mit-

Immigrants signal their relief at the defeat of the right

THE ATMOSPHERE was more fairground than political raily, as tens of thousands of Parisians flocked towards the Place de la Republique on rand voter. In politics there are some coinci-Sunday night to celebrate President François Mitterrand's re-election.

For the crowds moving on foot and in hooting, overloaded cars towards the Republique - converted for the occasion from its usual hair-raising traffic roundabout into a giant bandstand - Mr

Mitterrand's victory was never in doubt.

But there was still a tangible sense of relief, especially among the many West African or Maghrebin immigrants without a vote. They have for the most part adopted Mr Mitterrand as their saviour from the rise of the racist National Front and its leader, Mr Jean-Marie Le Pen.

For them, the last week had raised new fears, as

the dramatic release of three French hostages from Lebanon was followed in quick succession by the bloody assault on the cave in New Caledonia where 23 gendarmes were held captive by Melanesian separatists, and by the premature return home of Captain Dominique Prieur, the secret agent exiled to the South Pacific for her part in the bombing of the Greenpeace flagship, Rainbow Warrior, three years ago.

The Chirac Government seemed in their eyes to

be ready to use any means to win the votes of the

"We were all waiting for police raids last week on the immigrant hostels, we were sure there would be a clampdown to attract the Le Penists," said Mr Dia Salion, a Senegalese immigrant.

Even the West Indians were afraid of a Chirac dences you just don't believe in.

Mr Jack Lang, the former Socialist Culture Min-ister, pressed the point home in the star-studded line-up of musicians he produced for the Republique festivities, with Caribbean groups like Kassav and West African musicians like Manu Dibango bearing the message of cultural diversity.

"France is like a moped – not very advanced, and it runs on a two-stroke mixture," quipped one of the sincers.

In the rare political interludes between the music, there was no doubt who the crowd saw as the villain: Mr Charles Pasqua, the Interior Minister, negotiator of the hostages' release, instigator of the mass deportations of illegal immigrants, architect of Mr Chirac's shift in the direction of the National Front voters over the last two weeks.

"Pasqua, Assassin," they chanted, and, "Give us back Mandela, we'll send you Pasqua."

Mr Chirac himself, although the right's candidate, escaped virtually unscathed from the crowd's attacks. In the Republique and along the ulevard du Temple and the Boulevard Beaumarchais, leading to the Place de la Bastille, the milling revellers were enjoying themselves too

much to waste time on political acrimony.

"It is more spontaneous, more cheerful than in
1981," remarked a Spanish Republican who fied to France from General Franco half a century ago. one of the few in the crowd aged over 30. But this was not the same political event as the 1981 celebration, when Mr Mitterrand brought the left back to power after 25 years waiting in the

wings; more a burst of youthful high spirits. The "pink wave" of seven years ago has given way to the "Mitterrand generation", younger and less

investors

to woo

THE DWINDLING confidence of Portuguese investors revealed by surveys of industry has prompted Mr Miguel Cadilhe, the Finance Minister, to bring forward a cut in interest rates scheduled for the summer. Credit ceilings con-tinue, however.

havimum lending rates have been out by one point to 17 per cent. With annual inflation ranning at 8.6 per cent, real rates despite regular cuts nce 1986, are expensive for verage borrowers.

Small and medium beamessen, the pillars of Portuguese industry and commerce and heavily responsible for last year's landslide victory of the Social Democrat Government, cite difficulty in obtaining credit as the basis for their reluctance to invest.

As a sep, the Finance Minis-try has now exempted small and medium-sized businesses from the 0.5 per cent sur-charge on loans exacted from boxrowers for a bank compensation fund. Large bo will still pay the surcharge.

Declining investor enthusiasm is a damp squib for the
self-assured Government afterlast year's unprecedented 20 er cent investment growth. By the end of 1987 com sy the end of 1867 com-plaints were growing about tough credit cellings aimed at keeping down inflation. Monthly investor confidence graphs by the lastitute of Sta-tistics becam a drautic declina. graphs by the amentum tistics began a drastic decline.
Furthermore, the Government's slowness in starting its privatisation programme, and rowth of the huge accumu-ated public debt to more than 75 per cent of gross domestic product, are constantly squeezing credit for the private sec-

The EC Commission has produced the most detailed forecast yet on the impact of the changes planned for 1992, Guy de Jonquières reports

Single market gains depend on more than lifting barriers

have to do more than simply dismantle its internal trade barriers by 1992 if it is to realise the full market, according to a report published yesterday by the EC

Ø

It says that to exploit all the potential gains, the Community must also have a strong competition policy and achieve agree-ment rapidly among its members on co-ordinated macro-economic policies designed to stimulate growth and demand.

The report warms that transi-tion to a single market will be likely to involve a difficult adjustment process. Some job losses will be inevitable in the short-term as industries are rationalised and restructured in

Without close policy co-ordina- past year. tion in an economically more interdependent EC, there was a accompanying change in macro-ous regulations" — or "a broader, danger that countries would resort to recessionary adjustment measures, the costs of which would be exported to their part-out (GDP) by about 4.5 per rationalised internal market."

It estimates that, without any such as customs delays or various regulations" — or "a broader, ous regulations" — or "a broader, strategic and long-term view of the empirical form of the benefits from having a fully product (GDP) by about 4.5 per rationalised internal market."

ysis of specially commissioned adopted what the report calls "a really believed it would be put economic studies and market narrow, technical and short-term into effect and planned their

research conducted during the

ners.

It also says the growth of 1.75m over the medium-term.

intra-EC trade and freedom of Price inflation would be reduced intra-EC trade and freedom of capital movements envisaged in the single market plan could create instability by aggravating exchange rate fluctuations. A strengthening of the European Monetary System was therefore necessary.

The report is the most comprehensive and detailed attempt yet to forecast the impact of proposals to complete the internal market on the EC's overall economic performance and on individual industries. It is based on an amalysis of specially commissioned and the EC's budgetary and the EC's budgetary and the EC's lass white Paper on the single market with sufficient speed and conviction to reinforce the credibility of the operation. Implementation of half of the advantage of the release of these extra productive resources simultaneously to adopt more expansionary policies, GDP could increase by 7 per cent and half of the total potential benefits, it is says. This comprehensive approach was necessary as much for psychological as practical reaposition in public finances.

The report is the most comprehensive advantage of the release of these extra productive resources simultaneously to adopt more expansionary policies, GDP could increase by 7 per cent and employment by 5m. That could be eachieved without any inflationary risks or a deterioration in public finances.

The report is the most comprehensive advantage of the release of these extra productive resources simultaneously to adopt more expansionary policies, GDP could increase by 7 per cent and employment by 5m. That could be eachieved without any inflationary risks or a deterioration in public finances.

The eventual economic gains and the EC's 1885 White Paper on the single market with sufficient speed and conviction to reinforce the credibility of the operation.

"Implementation of half of the total potential benefits," it says. This comprehensive approach was necessary as much for psychological as practical reasons, since the success of these extra productive resources simultaneously to adopt more expansionary policies, and conviction

'Some job losses will be inevitable in the short-term as industries are rationalised and restructured'

strategies accordingly.
"While the collective advan-tages of the internal market are great, the individual risks are equally great. Firms will not venture into the unknown," the report says. "Excessive slippage in the timetable, obscure compromises and inconsistent decisionmaking may all undermine the

Though removal of frontier and regulatory barriers was vital and would yield appreciable short-term gains by reducing businesses' administrative costs, the report stresses that the big-gest benefits of a single market would be achieved over the longer-term. performers benefits would include poor.

restructuring by industries to The effects were likely to be secure improved economies of least in more traditional indusscale and the eradication of inef-ficiency due to over-manning and excess inventories and over-ket barriers did not appear to heads. Companies might also be impose a stimulated to exploit comparative handicap. to innovate faster.

reaction, or "multiplier effect" which would produce a virtuous circle of non-inflationary growth. It emphasizes that the role of vig-

action would be needed to prevent companies from segmenting markets and abusing dominant

away from dependence on mature, traditional activities and into technologically advanced sectors offering faster growth, the report said. The EC lagged behind the US and Japan in fast-expanding indus-tries with a high technological content, such as electronics and electrical and office machinery, it explained. It gave that as a prime reason for the EC's recent disappointing growth and international trade

Sectors with fast-growing demand accounted for 22.4 per cent of value-added in EC industry against almost 27 per cent in the US and more than 28 per cent in Japan. EC productivity in these sectors had been relatively poor, the report

added. between Pharmaceuticals and chemicals were the only important technologically-intensive busi-nesses in which EC industry had performed strongly. The Community's best productivity was in food, drink, tobacco,

textiles, leather, clothing, nonmetalliferous ores and building materials. Those were all handled by industries for which national markets were big enough to

offset the effects of non-tariff

barriers. In several of the industries EC manufacturers faced severe competition from the Third World, the report went on. They had managed to defend themselves by shifting into top-of-the-range products, where world demand was

growing fastest. Between 1979 and 1985, the EC's share of the market in the rest of the world for manufactured products fell by 1.4 per cent while the shares won by the US and Japan rose by 0.7 per cent and 5.4 per cent respectively. The EC's market share improved in slower-growing sectors, but fell rapidly in many high-growth industries. C manufacturers fared better on their home and other Community markets. Yet imports from outside the EC had grown much faster than intra-EC trade in some products. The report cited information technology, electrical equipment.

machinery and vehicles.
single market should boost the competitiveness of high-technology industries. It would cut administrative costs of meeting differing technical regulations and standards. lore importantly, it would make bigger economies of scale

The most positive impact of scale economies would be in production, said the report. That was where increased vol-ume and efficiency would enable manufacturers better to recoup development costs. But those benefits could be achieved only by further restructuring and rationalisation of the industries concerned.

tical about economies of scale in research and development. It suggested that competition might be more important than company size in stimulating rapid and commerciallyproductive innovation.

Saudi king plans first Cairo visit By Tony Walker in Calru

KING FARD of Saudi Arabia will visit Cairo soon, according to Egypt's Middle East News Agency. It will be the first visit to Egypt by a Saudi moherch in more than a decade.

Western officials in Calto see the forthcoming visit as another indication of moderate Arab states seeking to forge stronger links with Egypt sther a tresse in relations. Most Arab countries, including Saudi Arabia, suspended diplomatic ties with Egypt after it had signed the 1978

Egypt after it had signed the 1979 peace treaty with large!

Relations between Egypt and Saudi Arabia were soured during the last year's of late Procedum. Anwar Sadat's rule. Mr Sadat, who was assassinated in 1981, publicly insulted the Saudi Royal family on several occasions after Saudi Arabia suspended relations.

An Arab League summit in Amman last November fread member states to resume full diplomatic relations with Egypt. Most Arab countries had retained interest sections in Cairo.

No date for King Fahd's visit was announced, but diplomats here speculate that it may precede a planned emergency Arab League summit due to be held in Algiers at the end of the first week of June.

The summit has been called to shore up Arab support for the Palestinian uprising in the West Bank and Gaza Strip now in its sixth month. While the Amman summit was dominated by the moderate Arabs preoccupied about the threat of Iran and the Guif War, the Algiers gathering — if it takes place — is likely to see the militants such as Syria play a stronger role.

business circles.

STORA is considered to be the world's oldest company.
It was active, however, long before 1288. Copper from
Falun was a sought-after commodity in the Viking age for swords and ornamentation; and the demand for it extended far beyond the Swedish borders. In the Falun mine, the birthplace of the Company, we are still mining

copper, and recently we have found a rich gold deposit, which has increased the yield of ore substantially. Today, STORA is a major forest industry which converts its own forests into wood products, pulp, board and

many different kinds of paper. Our markets are world wide, and we export more than 70% of our total production.

A good example of a modern day success story is

Billerud's liquid packaging board, which is used today all over the world in the packaging of various products, such as milk, fruit juices, wine, cooking oils, etc. Even the

Vikings didn't get that far.
Through extensive research and development STORA is today one of Europe's leading forest industries, using hi-tech production methods. We'vecome a long way from the Vikings only progressive companies prosper.

The STURA group has a numiver of more than SEK 20,000 million and has approximately 22,000 employees. The Head Office is located in Falon, Sweden. FOREST and FOWER for business. STORA TIMBER produces high quality sawn timber and joinery products. Polp is marketed by STORA CELL BELLERIED manufactures packaging paper, board and specialism from FAYARIS and reverprint and magazine paper from KVARNSVEDEN, HYLTE BRUE and STORA FOREST INDUSTRIES. Other mills are SERGVIK KIEM (chemicals), STORALENE (if GMAN (priming lails) and the STORA MINE (the Falon Mine, red pains pigment and mightan chemicals). All research and development is carried out by STORA TECHNOLOGY.

Japan protests to Gatt at EC 'screwdriver' measures

BY WILLIAM DULLFORCE IN GENEVA

In unusually aggressive style the Japanese called an extraordidown on electronic typewriters and electronic scales produced by five assembly plants on EC terri-

Last month the EC Council imposed duties on electronic typewriters assembled by Canon Bretagne in France and by Kyu-shu Matsushita, Sharp and Silver Reed in the UK. Duties were also charged on electronic scales produced by TEC (UK) in Preston. The Japanese companies were assembling mainly imported components at these plants, in order to circumvent anti-dumping duties on their products, the EC

to farmers. Such a move could allow governments to keep small family farmers on the land while

letting larger enterprises compete on liberalised world markets.

problem today for governments is

much less how to support agri-culture than what policies they should follow for the rural econ-

omy as a whole. Sir Michae

argues that industrialised states

should abolish their ministries of

agriculture and replace them

with rural affairs ministries.

He also maintains that the

Strait of Hormes This would allow Iraq to switch all its exports through Saudi Arabia if Iranian forces and their Kurdish guerrilla allies operating in northeast

Gulf war zone, will be a big strategic boost for a belea-

guered country and would remove the threat to industrial

nations if Iran closed the

pipelines into Turkey.
The Iraqis already have three pipelines linking southern cilfields with Saudi Arabia's Red Sea terminal of Yanbu and northern diffields with the Turkish port of Yamurtalik on the Mediterra-

These carry an estimated 2.5m barrels a day. Another 200,000 are taken by truck across Jordan and Turkey. The new pipeline, with a planned upgrading of the Saudi Arabian link to 1.6m b/d by the end of 1989, would

boost Iraq's export capacity to

am b/d by 1990.
Iraq began building its pipeline network several years ago after the war cut it off from its main export terminals in the northern Gulf and Syria closed a pipeline to the Mediterranean across its territory. In the early days of the war, iraq's oil exports plummeted to around 650,000 b/d.

Now it is developing new oil-fields which could boost pro-duction to 5m b/d by 2000.

Iraq building 400-mile oil pipeline

the country.

key in the north.

IRAQ is building a new pipe-line that will enable it to pump oil through either Turkey or Sandi Arabia and so boost its ability to maintain exports vital to its war effort against Iran, AP reports from Nicosia. The Middle East Economic Survey, the weekly oil industry newsletter published in Nicosia, says the 400-mile 42-inch pipeline will run parallel

to an existing north-south pipeline running the length of The new pipeline, with a capacity of 900,000 barrels a day, was expected to be com-pleted by 1990, hooking into a network linking Iraqi oilfields with outlets across Saudi Arabia in the south and Tur-The project, which will secure Iraq's ability to pump oll exports safely out of the

erate idea.
On paper the concept seems ideally suited to developing countries whose borrowing capacity following the debt crisis is limited. It requires contractors to put equity into projects they under-take. Those projects are expected to stand on their own feet commercially so lenders can be repaid out of revenues and the state does not become financially

In practice, however, such deals have been difficult to get off the ground largely because the private sector has been unwilling to take the risk on to its own books. Pakistan's scheme

is carefully designed to alleviate much of this concern. It is strikingly different from that proposed by Turkey both because of the active involvement and encouragement of the World Bank and also because it requires the projects to be 25 per cent financed with equity, com-

Peter Montagnon on a new approach to infrastructure financing

TURKEY has always attracted most of the limelight in the debate over the "build-own-operate" concept of financing infrastructure projects in developing countries. Behind the scenes, however, the idea is now receiving a big push from another country, Pakistan, which, according to businessmen and bankers, has adopted a more promising approach.

The £200m power station contract announced last week by Hawker Siddeley of the UK is only one of a string of energy projects being planned by Pakistan with the help of the World Bank. Collectively they are worth more than \$2bn (£1.07bn) and all involve private sector financing and commercial risk, which is the hallmark of the build-own-op-

involved.

With your support services in South East Wales

You'll have a sharper edge in the City.

Lets get straight to the point. We're not about to suggest you move your entire financial operation out of London. Far from it. When the hub of your business is in the City, it makes sense to keep a presence there.

But your support services are another matter. In today's world of telecommunications and global networking, they can work more effectively elsewhere. And without the crippling burden of inflated office costs and high London salaries.

So why choose South East Wales?

With a thriving economy and a fast growing services sector, there is no doubt the area has exciting potential, We can offer a wide choice of prime office accommodation and sites. High calibre staff. And an excellent communications link by rail, road, air and the latest digital data transmission services.

Outside work, you can enjoy an enviable quality of life. We have superb housing, stunning

countryside and first-class educational and recreational facilities.

Our Financial Services Team will show you

how South East Wales can give your business a cutting edge.

So write to Stephen White or Mike Price at the Welsh Development Agency, Pearl House, Greyfriars Road, Cardiff CF1 3XX or ring them on Cardiff (0222) 222666.

over INF ratification

SENATOR Robert Byrd, the Senate majority leader, yesterday warned the White House that a veto of the US Trade Bill could delay ratification of the intermediate-range nuclear forces treaty.

The bill has passed both houses and ought to be on the way to President Reagan's deak. However, Democratic leaders are revising it through an unusual procedure generally reserved for technical corrections, in hopes of building support for the measure.

The White House has asked the

Senate to ratify the INF treaty by May 29 when President Reagan goes to Moscow for a summit with Soviet leader Mikhail Gorbachev. Sen Byrd said a trade bill veto by the President would take president would take tracedence was the treaty. precedence over the treaty.

He said Mr Reagan might be

debating a veto override on May 29 with the treaty still not Senator Byrd also warned that

his colleagues "ought to dishelieve the bunk they've been getting from the White House" that a more moderate version of the Hill would pass if the president's

Reagan's special adviser on arms control, said the chances for an early treaty by the US and the Soviet Union to halve strategic nuclear arms would slip unless a pact was agreed well in advance of the US election in November.

Byrd warns | Win by Borja calms Ecuador

THE TRIUMPH of Mr Rodrigo Borja, the Social Democrat candidate in the second round of the Ecuadorean presidential election on Sunday, has averted a serious polarisation of the country.

Mr Borja, a 52-year-old law pro-fessor who heads the leftist coaliztion, Democratic Left, beat off a strong challenge from Mr Abdala Bucaram. The result was closer than predicted with Mr Borja obtaining 47 per cent of the first two thirds of the votes counted, and Mr Bucaram 40 per cent.

Banks reopen in Panama after 9 weeks

LONG QUEUES formed outside banks in Panama yesterday as people waited to make limited withdrawals for the first time in more than nine weeks. AP

reports from Panama A government order closed banks on March 3 after a run on savings by depositors and the imposition of US economic sanc-tions in an effort to force Gen Manuel Noriega to resign as chief of the military and effective head of government.

Gen Noriega was indicted in the US in February on drug-traf-ficking charges, which he has

a severe cash shortage in Pan-ama, which has the US dollar as

Mr Bucaram waged a rabblerousing campaign based on a curious cocktail of populist socialism, religious fanaticism and ill-defined authoritarianism. and in-defined authoritarianism.

The Ecuadorean military had hinted that, if he were to win, it might feel obliged to intervene.

The instability factor appears to have favoured Mr Borja, who narrowly failed to win the 1984 election against Mr Leon Febres Cordero, who will step down as president on August 10.

During his camanign, Mr Borja promised to raise Ecuador's international profile, roll-back some of Mr Febres's more free-market policies at home and take a tougher attitude on the country's 59.2hn foreign debt. However, he emphasised dialogue, not confrontation, with crediture,

The Democratic Left, which Mr Borja founded, is regarded as the best organised party in Ecuador and controls 30 of the 71 seats in

Atlantic Ocean, the detritus washed out from the continent serves as the base of the food involved in squid transforment chain which attracts shoals of in Berkeley Sound through its 10 mer thanks and the same transforment of Scullbern and the same transforment of the southern hake every year to per cent ownership of Sullivan migrate north from the South Shipping Services, 51 per cent of Atlantic and Falkland Islands. which is owned by the Falkland Argentine and Uruguayan trawl- Islands Development Corpora-

Under a common fishing agreement signed in 1974, the zone stretching out to the 200-mile limit is shared by both countries trawler fleets. But the boom in the South Atlantic fisheries since 1982 has caused a dacline in stretching out to the another lituing is shared by both countries' trawler fleets. But the boom in the South Atlantic fisheries since 1982 has caused a decline in catches in the River Plate region and the \$100m-a-year Uruguayan fishing industry is about to take a step which could deeply embarrass the Government of President Julio Sanguinetti and throw a "gross unethical conduct" in tra-

tle over the Falkland Islands. "Rither we get a fishing agree-ment with Argentina to fish in their waters or we will have to ask for fishing licences from Britain in the Falkland Islands," said Mr Americo Deambrosi, president of the Uruguayan Trawlermen's Association.

He explained that Uruguay's trawler fleet and shore process-ing capacity is under-utilised by 25-30 per cent. Further expansion has been halted and plans for joint fishing agreements with the USSR have been shelved because the present catches are insuffi-cient to keep Uruguayan trawlers fully employed. Last year a buoyant Uru-

Last year a buoyant tru-guayan economy experienced growth in almost every sector except fishing, which contracted by 1.1 per cent. In Argentina by contrast, fishing is virtually the only sector which is growing — last year at a phenomenal 20 per

Later this month, senior Uruguayan officials are due in Bue-nos Aires to begin discussions on the possibility of giving Uruguayan trawlers greater access to Argentina's 200-mile exclusive economic zone. It is a move likely to be fiercely resisted by the Argentine fishing lobby, the most technologically-backward of which depends entirely upon the southern hake fisheries. If the talks fail, Latin American solidarity on the Falkland Islands issue is likely to suffer its

first major setback since the 1982 Falklands War.

A senior diplomat at the Uru-guayn Foreign Ministry said his government wanted to be able to preserve its foreign policy stance on the Falkland Islands dispute: support Argentina's position on the basis of peaceful negotia-tions. "Such an application for fishing licences (in the Falklands) would be an obstacle," he admitted, but added that it would also be difficult, if not impos to prevent any private Uru-guayan company from making

However, at least two Uruguayan companies are already involved in the transhipment of squid catches from Asian trawlers to boats in Berkeley Sound, just north of Port Stanley in the Falkland Islands. The same boats call at Montevideo and pick up call at Montevideo and pick up stores and foodstuffs, not only for the trawlers, but also for the 2,000 inhabitants of the islands. According to Mr Jorge Fernandez, the president of Caristophersen Shipping in Montevideo, each month eight or nine ships call at month eight or nine ships call at month eight or nine ships call at

The lucrative contracts have become a source of cutthroat competition with another Uru-

Julio Sanguinetti and throw a "gross unethical conduct" in try-new light on the diplomatic bat-ing to monopolise the Falklands transhipment business which he has built up with his son over the

The dispute centres around a ship, the MV Blakeney, which Mr Pena sold to Sullivan earlier this year, on condition that Sullivan would provide launch and tran-

shipment services from Port Stanley to Berkeley Sound. A subsequent telex from Sulli-van to Mr Pena states: "We are the exclusive agents in the Falk-land Islands for all vessels with which you are associated and you shall not be at liberty during the concurrency of our arrangement with you to employ or engage any other agent in the Falkland Islands so long as we are willing to provide account of the concurrence of the co to provide agency services for the

Mr Pena is so enraged by the incident that expletives worthy of a paratrooper escape his otherwise controlled language. To win business and goodwill in the islands, his company has been transporting goods free of charge from Montevideo to the Falklands. This goodwill is now threatened, he says, by Sullivan's attempts to be the exclusive agent for the shipping lines which Mr Pena represents out of Montevideo. "It is a simple matter of business competition," said Mr Fernandez of Christophersen.

There are now some 500 deep-sea trawlers operating in the South Atlantic, including the Falkland Islands Conservation Zone, Argentina's 200-mile limit and international waters outside both zones but over the continen tal shelf. The size of the annual catches, now probably approaching im tonnes, is valued at well

OFT accepts undertaking over use of bus station

BY KEVIN BROWN, TRANSPORT CORRESPONDENT

competitors from their bus stations might be in breach of com-petition law, Sir Gordon Borrie, Director-General of Fair Trading,

has warned. Sir Gordon said the OFT had accepted an undertaking from Southern Vectis Omnibus that competitors would be allowed to use the company's bus station at

nse the company's this station at-Newport, Isle of Wight.

The OFT had threatened to refer Southern Vectis to the Monopolies and Mergers Commis-sion after a complaint by Gange Taxis and Minicoaches, of Cowes, Isle of Wight, that it was refused excees to the station ss to the station.

The undertaking, which lasts those stations, where for 10 years, means Southern not already done so."

BUS COMPANIES that exclude . Vectis will not be referred to the commission, provided the company complies with it.

Sir Gordon's investigation of Southern Vectis was the first carried out by the OFT into an operthe deregulation of bus service in October 1966. Sir Gordon said: Exclusive use

of a major bus station by a company which also has a dominant position in supplying local bus services can frustrate the emer gence of competing bus services." He saided: "I hope that other companies owning bus stations eisewhere will similarly agree to admit other bus operators to those stations, where they have

Economic cost of food poisoning 'enormous'

THE NUMBER of reported cases of bacterial food poisoning in the UK rose by 50 per cent between 1982 and 1986 according to a report published by the University of Bradford.

The report, from the University's Food Policy Research Unit, said the economic easts of food poisoning — which on official figures affected 22,000 people in 1986 — were enor-mous. An outbreak of botalism mous. An outbreak of botulism in Birmingham in 1976, for example, cost the company involved about £2m, while an outbreak of salmonella at a baby food factory in 1985 pushed the business affected into voluntary liquidation.

The consequences for food companies are potentially disastrous, said the report.

Sales of other products mar-

Sales of other products marketed under the same brand may be affected adversely even

though they are manufactured in quite separate plants." The report said the public relations response of compa-nies to outbreeks of food poisoning was crucial. It said: "Companies must be able to demonstrate that they are behaving in a responsible fashion, and they are taking all practical steps to alleviate the

Food manufacturers, the report said, should do more to tell the public what they are doing, a move which in turn would raise the level of food

hygicae.
The current tendency to remove preservatives from food could be counterproductive, claimed the report.

Undoubtedly," it said, "there are cases where improvements in processing technology and in packaging mean that preservatives become superfluous.

"But there are other exam-

ples where preservatives are being taken out on rather questionable grounds, so that the shelf life of products is being shortened as a result." The report said preserva-tives were being removed because of public concern and pressure from retailers, even though on safety grounds though on safety grounds there was little cause for concern. It suggested that their removal might be ill advised because of the increased risk of food poisoning.

RB-211 powers Rolls-Royce back to strength

A delivery milestone marks how far a jet engine maker has come, Michael Donne reports

heed of the US for TriStar airliners are taken into account, the Rolls-Royce holds firm orders for another 255 RB-211s, with options on 194 more, making a total of 2,049 engines.

The engine, which in its original 22B version pushed Rolls-Royce into bankruptcy in 1971, has generated nearly £4bn of business. It remains the core of the company's rapidly expanding civil engine business.

That is business.

That is justification enough for the decision in the dark days of 1971 to continue work on the RB-211, but Rolls-Royce believes that new business still to come will

The company is cautious about assessing what share of that it can win in competition with its rivals, General Electric and Pratt & Whitney of the US, but in an attempt to win as much as possi-ble Rolls-Royce is offering ver-sions of the RB-211 for a variety of aircraft above about 180 seats, which are likely to account for more than three quarters of the total world market.

In the smaller category of 75-100-seat aircraft it is offering the smaller Tay engine, development of which owes much to the technology emerging from continued research on the RB-211.

Rolls-Royce RB-211 engine will thrust, which caused all the originach a milestone with the delivery of the 500th unit for Boeing, the US jet airliner builder.

If deliveries of RB-211s to Lockheed TriStars in heed of the US for TriStar airling which it is installed.

From the 22B, however, the total number of deliveries of all RB-211 has been progressively versions is 1,600. In addition, improved and enlarged. The 535C Rolls-Royce holds firm orders for and R4 versions, also of about 40,000lb thrust, are well established in an expanding market — the twin-engined Boeing 757. This is basically a short-to-mediumrange airliner but is finding a new role on long-distance routes.

> niche in the Boeing 747 long-range jet but also powers the Boeing 767 twin-engine medium-to-long-range airliner.

Rolls-Royce is already expandfar outstrip the achievements to fing this base, as part of its mardate. Rolls-Royce estimates that heting strategy, which is simply from now to the year 2006 the world market for jet engines of all types will amount to 2110km. The strategy expansions to get all of its civil engines installed on as many different types of airliner as possible.

That is essential, for General Electric and Pratt & Whitney are doing the same and in some mar-kets they have a long start over Rolls-Royce – for example, in the various models built by Airbus, a market that emerged in the 1970s

Airlines are increasingly anxious maller Tay engine, development to carry greater payloads per first production 524G is the flight, because of the growing engine now being delivered to congestion at airports which is esearch on the RB-ZII.

House of Lords
(Lord Bridder of Harwich,
Lord Braddon of Cakbrook,
Lord Bridder of Chieveley):
May 5 1988

In the present case all members of the Court of Appeal expressed their anxiety about the present state of the law. There was liftle doubt that they gave leave to appeal in the hope that the House might conduct a fall-scale review of the authorities and of the mutual obligation.

The House should not embark on a review unless it felt free, if necessary, to depart from the res-

necessary, to depart from the rea-soning and decision in Bremer. Vulkum. Nor should it embark on a review unless satisfied that it would be relevant to resolution of the dispute.

The House of Lords had repe etily stressed that it would not embark on an inquiry into an issue which was only of academic interest. A fortiori it should not do so where the inquiry involved review of a previous House of Lords decision, because it could not be right to hold obtter that such previous decision was

On the findings of fact in the present case, which were unas-sailable, the appeal was bound in any event to fail. Therefore it was not an appropriate case in which to conduct a review of the earlier authorities. For that rea-

P&O dismisses draft deal between unions, Sealink

P&O, the ferry company, yester-day appeared braced for for a long war of attrition with the National Union of Seamen despite efforts by Sealink, its main cross-channel ferry rival, to reach an agreement with the

P&O described a draft agree-ment reached by Sealink and NUS leaders at the weekend as "irrelevant" to its own plans of getting its ships back to sea using crews not recognised by

The company's rejection of the possible Sealink deal as a factor in the resolution of its own 14week-old dispute with the NUS came as the union's ferry port stewards from all over the country met to discuss Sealink's offer. Lorry drivers, meanwhile, blockaded the ports of Dover and Cal-ais in protest at the strike.

sidered an offer from Sealink organisers from Dover, on the which may lead to the end of all south coast, Liverpool, in the send the lifting of the sequestration of the sequestr tion of the union's assets.

Under the proposed deal, Sealink has promised to employ as temporary, casual workers on two cross-Channel ferries some 450 of the 743 Dover seamen within the union because of the sacked by P&O during the dispute being taken by some dispute being taken by some local managements. This was

THE LABOUR Party last night forced the House of Commons into debating the seamen's strike next Wednesday.

After unsuccessfully press-

ing earlier for an emergency debate on the crisis, Labour decided to switch the subject of the half-day debate they are mounting on Wednesday, from housing to the P&O dispute.

Labour's business managers took this decision after the Speaker (chairman) refused an

siderable commercial pressure to draw up alternative "contingency plans" if the NUS rejected its pro-

anxious to reach a deal with Seal-ink because of the operational difficulties they face after sequestration. However, last night's meeting was expected to be The meeting last night at the meeting was expected to be TUC's London headquarters constormy, with hardline union tish ports, supporting further nationwide industrial action "in defence of the union."

There were signs last night that a split was developing within the union because of the working practices.

Sealink yesterday agreed to extend its 10 am deadline for acceptance of the deal on the understanding that the TUC meeting would endorse it.

Output being taken by were the local managements. This was denied by Mr Sam McCluskie, NUS general secretary, as he arrived for last night's TUC talks.

At the seaports, lonry drivers

appeal by Mr Michael Meacher, Labour's employ-ment spokesman, for an emergency debate on the dispute which, he warned, could undermine safety on P&O fer-ries.

Mr Meacher said: "If the Herald of Free Enterprise were to sail tonight from Zeebrugge, it would have 15 fewer crew than the night in March last year when it went down,"

the lack of progress in settling The drivers said they had no rgument with P&O, Sealink or he Dover Harbour Board, but blamed NUS members for the longdelays they were facing. These, they claimed, were put-ting at risk the fate of haulage

companies and thus their own

After a meeting with Mr Graeme Dunlop, P&O European Ferries' managing director, the drivers made it clear they were "fed up with being used as a foot-ball" between the NUS and the company, and warned they would maintain their blockade unless

P&O agreed to resume talks with the NUS to end the dispute.

But P&O's rejection of any negotiated settlement of the dispute was symbolised yesterday by confirmation it had sent an advance party of seamen to join

TSB forms offshoot | Owen faces long political haul after election blow

BY PETER RIDDELL, POLITICAL EDITOR

IF DR DAVID OWEN was a French politician he might be rench politician he might be awaiting a call from President François Mitterrand to become Prime Minister. In the US he might have pipped Governor George Dukakis for the Demogratic positions. cratic nomination.

However, in Britain he has become increasingly isolated following the break-up of his party's alliance with the Liberal Party. He is now a leader with barely a party, who captures the headlines as a result of coquettish exchanges with Mrs Margaret Thatcher, the Prime Minister.

Last Thursday's local government elections in Britain were a disaster for Dr Owen. His Social Democratic Party won only six seats, compared with roughly 335 for the Social and Liberal Democrats (the Democrats). This was the party formed by former Owenites who wanted a merger with the Liberals. On the SDP's own calculations its candidates averaged 9 per cent of the vote where they stood, and 5 per cent where they were fighting the

Plenty of excuses have been offered. The party was re-estab-lished only at the beginning of March and did not have time to get going again. The refusal of the Democrats to negotiate elec-toral pacts in most places was iging. While the SDP can Dr Owen leaving his Westminster office with point to a few districts, such as Gillingham and Liverpool, where this disagreement cost the Demo-crats council seats, the number

formed relatively worse in previously SDP dominated seats such as Cambridge, Bath and Stevenage. There the divisions may everything turns on Dr. have undermined the morale and activity of even those who joined

the Democrats, leaving isolated the choice of options between the

In practice, therefore, almost everything turns on Dr Owen. He is a man of remarkable political

talents. As Mrs Thatcher pointed the new merged party.

Out in a recent Sunday Times
All this leaves the continuing interview, Dr Owen has a feel for All this leaves the communing interview, he owen has a real for there is to be a large centre or there is to be a large centre or there is to be a large centre or ple, "fundamental things" such third force it will be the Demo-as crime and defence, and an awareness of how to present.

The lieur

this disagreement cost the Democrats council seats, the number was small.

Indeed, the main conclusion drawn by Democrat leaders is that fights with the SDP ware relatively unimportant — and Dr Owen's candidates can be largely ignored. This undermines at the first skirmish the SDP's hopes that its candidates would do well enough to force the Democrats to come to the table and negotiate an electoral deal.

In broader terms the split has undoubtedly been damaging. Not only did the centre parties suffer formed relatively worse in previously SDP-dominated seats such as Cambridge. Bath and Steven.

The common link is not only is a destructive force like Lloyd be a destructive force

there is to be a large centre or third force it will be the Democrais.

Dr Owen's party claims about 30,000 registered supporters, but backing is patchy. Many of the most experienced former Social Democrat activists have joined was a concerning ordinary people, "fundamental things" such a provious radical national-awareness of how to present is activity as and Lloyd George, Dr Owen faces the problem that nothing can be achieved in the British system where Britain is going.

Dr Owen is undoubtedly sinachieved in the British system where Britain is going.

Industry's costs up sharply as sales and credit also show rises

OFFICIAL FIGURES yesterday showed that industry's costs rose unexpectedly sharply in April, while consumer credit and high street sales continued to rise buoyantly in March.

The data combined to dampen

suggestions that UK growth may be slowing and to highlight infla-tionary pressure in the economy.

The Department of Trade and The Department of Trade and Industry said its price index of materials and fuel purchased by manufacturing industry rose 0.6 per cent in April. It said the rise mainly reflected higher electricity costs and costs of home produced materials bought by food manufacturers.

Seasonally adjusted, the index rose 1.1 per cent in April – the largest monthly rise since July 1987. The index was 2.8 per cent up on April last year.

The increase was larger than forecast by most independent economists and would probably have been even higher if the strong value of the pound had not moderated the cost of imported materials.

**march.*

The figures confirmed the view of many independent economists that UK inflation has reached a low. Higher factory-gate prices are likely to lead to higher retail price inflation in coming months, although manufactured moderate. imported materials.

imported materials.

Yestenday's figures also show a steady rise in factory gate prices of manufactured goods last month, which pushed the annual rate of increase to the highest level for more than a year.

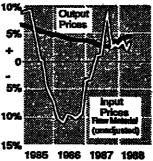

The DTTs index of factory-gate or output prices was 0.6 per cent higher in April than the previous month. About a quarter of this rise was due to duty changes announced in the March budget.

Output prices in April were 4.2

Table to the basket of cent the basket of goods and services comprising the retail goods and services comprising the retail goods and services index.

although manufactured products.

the first three months of this year retail sales were 1.5 per cent higher than in the previous three months and 8 per cent higher than the first quarter of 1987.

The strength of sales high-The .strength of sales high-lights the buoyancy of the British economy, particularly in the con-sumer sector. Other figures, also published yesterday by the DTI, show consumers' use of credit to finance spending is not abating and may be accelerating.

The DTI's narrow measure of outstanding consumer credit rose.

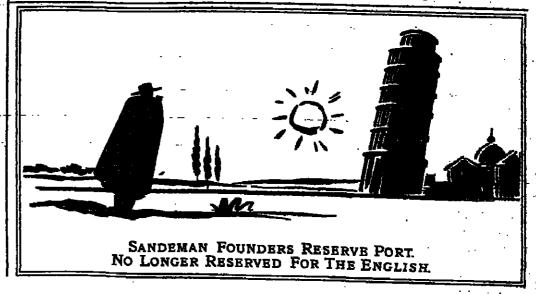

outstanding consumer credit rose a record £423m to £28.98bn in March. That followed rises of about £300m in January and Feb-

The figures includes borrowing on credit cards and agreements with building societies, retailers, and finance houses. They exclude lending for house purchases.

Broader quarterly figures, which also cover bank loans on personal accounts and loans by insurance companies, show outstanding credit rose a record £1.51bn in the first three months of 1968 to £37.92bn. This was 4 per cent more than the total outstanding at the end of 1987.

The sharp increase in credit and retail sales reflects consumers' confidence about their financial positions and strong growth in earnings, which continue to outpace retail price inflation.

Some economists, howeve fear excessive growth in high street sales may lead to rising imports and increased upward sure on prices.

meeting would endorse it.

The company, however, let it apparently in protest over delays since the beginning be known that it was facing concaused by the ferry dispute and pute on February 3.

Fact. In over 54 countries, in and out of major airports and remote airstrips a Citation takes off on a business flight every minute of every day.

Fact Citations have the best safety record for business jets in the world. A record so impressive, they are the only business jets to receive the Collier Trophy for Aeronautical Excellence.

Fact. Citations are so well engineered and designed, so flexible and so agile, they can be operated with a single pilot in many countries throughout the world.

Fact. The Citation worldwide

service network is the most extensive in the world of business jets.

All of which has led to another fact. Citations are the best selling business jets in history. We delivered the 1500th in January. And the first, delivered 17 years ago, is still in regular service.

But the last, and perhaps most timely fact, is that the current strength of the pound sterling means you can get about 26 percent more in dollar exchange value when you buy a new Citation than you could have received just 3 years ago.

To find out more about this outstanding opportunity, write to Cessna Aircraft Company, Citation Marketing Division, Executive Jet Centre, Heathrow Airport South, Hounslow, Middx, TW6 3AE, England. Or call (01)759-2814.

But do it today. Because, to twist a phrase, what comes down must eventually go up.

The best selling business jets in the world.

Scots Tory party urged to rethink policies

THE SCOTTISH Conservative Party, which begins its annual conference in Perth tomorrow after losses in last week's district

council elections, was yesterday myed decisively to reject the idea of establishing a Scottish assembly and to emphasise liself as the party of unionism in Scotland. A discussion paper by the Cenderds departments around the too fee Pelicy Spadies, the right country had shown that more wing thank tank, says that the than 500 complaints about time-Government should re-examine sharing had been logged last the hapharard develution of year. administrative powers to the Scottish Office, the Whitehall office responsible for Scotland. This may mean that some powers would be transferred from Edinburgh back to London to

aprove efficiency. Funds for Scotland should be allocated according to needs instead of a set formula under thich Scotland receives a fixed portion of Government expendi-ture. This, the authors say, results in Scotland receiving expanditure per head which is 28 per cent higher than that for

The paper, by Mr Liam Fox, Mr holida Mark Mayall and Mr Alistair years. Cook, attributes the decline of Scotland. It should present Scot-tish voters with a genuine alter-native to opposition policies.

The authors say that by perpetuating a system whereby Scot-land is regarded as a special case in the UK, the Tories encourage a feeling of alienation among Scots, boost Scottish nationalism and have to conduct the political debate in Scotland on issues that favour the opposition parties, in another paper published yes-terday, the Tory Reform Group in Scotland argues that the classles-

suess, meral responsibility and enterprise of modern Conservatism are congruent with Scottish culture. But to convey this mes-sage to Scots the party must re-identify itself with its traditional. "One Nation" values in order to The author, Mr Malcolm Mack

enzie, a lecturer at Glasgow University, says that Scots are allen-ated by policies advocated by extremist right-wing elements which are seen as "materialistic, class-based and fundamentally

Government keeps watch on timeshare industry

BY DAVID CHURCHAL, LEISURE INDUSTRIES CORRESPONDE

OFFICIALS at the Department of Trade and Industry plan to contimes their close monitoring of the timeshare industry - Europe's fastest-growing holiday concept in spite of fresh attempts by UK timeshare operators to "clean up" the industry's image.

The DTI revealed last week of 12 local authority trading stan-

The survey's findings were behind the department's decision to issue a warning leaflet to consumers about the potential prob-lems of timesharing.

The Government and other consumer protection agencies such as the Office of Fair Trading and trading standards depart ments are concerned at the contimping level of complaints about high-pressure sales techniques used to sell timeshare properties.

Timesharing, at its simplest, is a method of owning weekly periods of a property, usually at a holiday resort, for a number of

The concept is generally said the Conservative Party in Scot to have originated in the mid-land — which it says is a 1960s in the French Alps, where long-term phenomenon — to fis it became common practice for ambivalence towards administrative skiers to buy hotel rooms for a tive and legislative devolution for period of time each year rather than renting them.

its advantages are that holiday-makers can hedge against rising package holiday prices as well as participate in what should be an appreciating property invest-ment. Timeshare owners can also take part in exchange schemes in different parts of the world through companies such as Resorts Condominiums Interna-

Mr John Butcher, the Con-sumer Affairs Minister, has given a warning to consumers "to judge by the facts, not the frills, when they think about buying a timechars"

tional or Holiday Exchange Net-

He added: "I must emph that there is nothing wrong with timeshare in itself, but half-price timeshares, discounts, and prizes nay be nothing more than a

sales ploy."
Officials are frustrated at the bility of the UK Government to take action against rogue time-share operators because the probems nenally take place in countries such as Spain and other appreciation. Some public auc-

John Butcher: "judge by facts, not frills

Meetings held last year between DTI officials and their counterparts in the European Commission to see if Europeanwide powers could be adopted to regulate the industry have so far

ome to nothing.

Moreover, the problem facing regulatory anthorities in the UK and continental Europe is that timeshare - in spite of all the criticisms - is still seen by many consumers as a popular way of taking a holiday.

At least 120,000 Britons have so far bought a timeshare property (out of about 1.3m world-wide) and sales to British owners in the UK and abroad last year topped

In reality, however, timeshare has been shown to have its drawbacks. With fierce price competi-tion between package-tour opera-tors in recent years, timeshare does not necessarily work out cheaper in the short-term against some of the holiday bargains on

Moreover, the investment value of a timeshare property has to re-sell their timeshare. The Consumers' Association warned recently that the high marketing costs involved in timeshare developments meant that there was litle short-term property

countries not covered by UK tions of timeshare properties laws.

sale market However, most complaints received by consumer protection agencies are concerned more with the aggressive selling tac-tics used to persuade people to buy a timeshare in the first place.

Individuals are often lured to see timeshare properties with the promise of free gifts, hunch or travel. Once at the property, indi-viduals can be subjected to high-pressure sales techniques ting several hours.

The leading timeshare opera tors have reacted to such prob lems by forming a trade associa-tion, the Timeshare Developers Association, whose members have to agree to a code of con-duct about their marketing tech-

This code includes a minimu five-day "cooling-off" period after which timeshare buyers can change their minds

In addition, the code says that any resorts which employ timeshare "canvassers" are prepared to ensure their staff operate away been thrown into doubt by prob-lems owners have had in trying pools and are clearly identified pools and are clearly identified by a badge.

The association has also employed a full-time consumer services manager who has insti-gated an independent arbitration scheme to deal with disputes

Why pay a bank to have a business account when your bank could be paying you?

With most banks, a business account costs you money. At the end of every quarter, there'll be charges to pay. But with TSB, a business account earns its keep.

The account in question is our Managed Account, an account for the businessman where every single penny in credit earns you interest-money that can offset the cost of running your account and provide you with a handsome profit.

The account was designed to replace the need for several business accounts. It combines all the features and versatility of a current account with the earning power of a high-Only available from TSB England & Wales ple.

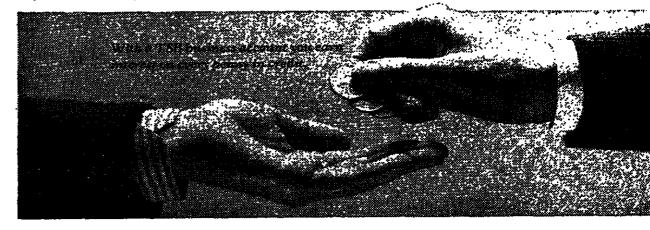

interest deposit facility.

So every working day the maximum amount of cleared funds automatically earns

More than that, full overdraft facilities can be built-in to help you cushion the blow against likely cash-flow problems.

TSB Managed Account. It's the business current account that pays you interest. For further details contact the Product Development Dept., Corporate Sector, TSB England & Wales plc, 60 Lombard St., London EC3V 9EA.

Half boring, wholly successful

GUARANTEED LTD

Mint Guaranteed Shares, August 1995

The boring part of Mint Guaranteed Ltd. is the capital protection. About half your money is invested in stripped US Treasury Bonds, designed to achieve return of the initial investment after seven years. With that secure, you can afford to have some excitement.

The rest of your money goes into a managed futures portfolio, managed by New York based MIMC, who have proved so outstandingly successful in recent years. This portfolio can make gains in both rising and falling markets - so it is the perfect balance to equity investments in today's uncertain world. The Funds under management by MIMC, which include Mint Guaranteed Ltd., have an average composite annual growth of 28.9% in US dollars since 1st April, 1981.

ABOUT MINT GUARANTEED LTD.

Mint Guaranteed Ltd. is sponsored by ED&F Man International Ltd. of London and it is advised on its trading policies by Mint Investment Management Company (MIMC).

MIMC have developed computerised statistical methods to analyse trends on world markets. Their disciplines preclude trading in volatile markets, and limit risk to no more than 1% of a client's investment when entering any one contract market.

The result is a blend of the high gearing and opportunity for gains offered by skilled futures trading, and severe disciplines to limit risk.

nas since stabilised. Today there wooll.

The shoddy mills around Prato in Northern Italy now absorb much of the woollen waste collected in Yorkshire. Similarly reclaimers, but it is still the old lindia has become an important waste market.

shire is shipped out to the textile industries of Italy and India.

The strength of sterling, however, has made it increasingly difficult for the Yorkshire companies to compete in their export markets.

The shoddy trade is composed of the "raggers", who collect woollen waste from the mills and discarded clothes collected in charity appeals or by dealers in try, owns the Ephraim Wood industry," said Mr Peter market.

The strength of sterling, however, has made it increasingly difficult for the Yorkshire companies are small, family firms, but a few benefit from low overheads with comparatively few employees and belong to larger groups. One of ittle expensive equipment—have thrived on their success in the export sphere.

But that success is now jeopardised by the strength of sterdiscarded clothes collected in charity appeals or by dealers in try, owns the Ephraim Wood infinity in the companies are small, family firms, but a few comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few employees and the lightly from low overheads with comparatively few e

British Coal 'can survive sell-off by electricity'

BRITISH COAL can survive elec-tricity privatisation if it is not exposed to an early free-for-all in exposed to all early flee-for-an incoal imports, says a report published by Financial Times Business information.

Its authors, Mr Michael Prior and Mr Gerard McCloskey, who also voice confidence about a pri-

vatised British coal industry, conclude that thanks to the steadily improving efficiency of steadily improving efficiency of British pits and a rising trend in international coal prices, coal imports by 1990 could be restricted to the coastal periph-ery of the electricity market. But if the Government encour-aged unbridled coal imports, up to 40 of the country's deep mines, many of which could be interna-

many of which could be interna-tionally competitive by 1995, would be closed in 1990.

would be closed in 1990.

British Coal immediately endorsed the report. "By 1995 any saving made by an all-out import policy in 1990s would have disappeared and the electricity supply industry would be paying millions of pounds more for imported coal than by buying British," the corporation said. British," the corporation said.

Among the study's findings

 Output of the Selby coalfield in North Yorkshire could be doubled to nearly 20m tonnes a year by operating a six-day week.

• The Central Electricity Generating Board could save only

tang Board tour save only importing 30m tonnes of coal a year - not £750m as the CEGB often claims.

With privatised Thames-side power stations switching to imported coal, electricity privati-sation could wipe out all but one of the mines in north-east England. However, time is also working on British Coal's side judging by the authors' forecast for rising international coal prices. They claim that by 1990 world steam coal prices will be between \$42 and \$52 a tonne, compared with \$33.50-\$36.50 paid by the CEGB on its spot tender in the summer of 1987.

By 1995, they expect prices to reach \$48-\$55 a tonne, and even higher if the CEGB or a privatised industry fuelled demand by large scale imports.

Coal on the market: Can British Coal Survive Privatisation? by Mike Prior and Gerard McCloskey; (FT Business Information, Tower House, Southampton Street, Landon WC2E 7HA); £250.

Rehabilitation plan for Royal Docks approved

THE LONDON Docklands Development Corporation yesterday opened the way for rehabilitation to begin on the Royal Docks, the largest remaining area of derelict wharves in inner London.

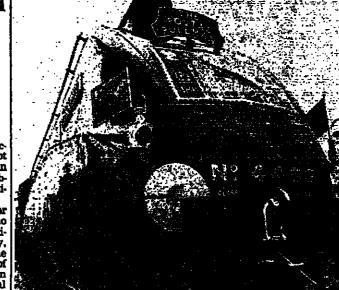

It agreed to provide 128 acres for Rosehaugh Stanhope, a joint venture of two property compa-nies, to undertake the first phase the north side of the Royal Albert

Isle of Dogs, comprise 500 acres of land, 240 acres of water and 10 miles of quaysides and represent one of Europe's biggest development opportunities. The LDDC has been negotiating with three consortia on redevelopment pro-

In the first phase of what could ultimately be a project covering 264 acres, Rosehaugh Stanhope plans 1.5m square feet of shop-ping and leisure space, 700 es, 1m sq ft of offices and a 150-boat marina.

Precise terms for the transfer of the land and a building agreement giving the LDDC some control over the development have still to be worked out. The LDDC still has to grant Rosehaugh Stanhope outline planning con-sent for the project, although the corporation has made clear it is disposed towards doing so. The LDDC is both landholder

and planning authority for the Royal Docks. As a planning authority it has received an application for a development on the land covered by the Rosehaugh Stanhope project from another consortium made up of London and Edinburgh Trust and Tarmac Properties. This bid now seems to have failed.

The Mallard steam locomotive which set a world speed record of 125mph 50 years ago this year, came out of retirement at Marylebone station, London, yesterday, to mark the issue of a set of Royal Mail stamps, one of which celebrates the 150th anniversary of the first Travel-ling Post Office trains.

The occasion coincided with the announcement of a £1.5m reorganisation of the TPOs, which sort and deliver mail during the night, as part of a campaign to ensure more letters arrive at their destination quickly. It will involve several new services and the upgrading of existing ones.

NOWHERE ELSE IN THE WORLD WILL YOU FIND COMPUTING SO COMPLETE

ADVANCED

rom desktop computing through to mainframe performance, there is now no greater power in computing. Apricot leads the world with the most complete and integrated range of advanced computers ever seen. Never before has one single open architecture been available at every level of performance. All breaking new ground in price performance. A range which spans one to one thousand users. From under £2,000* to £500,000. All using the same family of microprocessors. And all able to run the world's most widely-used advanced software. It can begin in the smallest office - where the built-in networking, unique in 80286 PCs, brings multi-screen solutions at a price you won't believe.* For the standalone power user looking for 32-bit performance, there is the 46 Mbyte 80386 based PC - ready to run for less than £3,000.** And where powerful, industry-standard networks and multiuser systems are required comes a wealth of choice. The VX1000 uniprocessor computers smoothly deliver 32-bit performance for up to 48 users — but without the price penalties and software limitations of proprietary minis. And to meet the simultaneous demands of hundreds of users, there is nothing to match the mighty VX9000 series. Harnessing up to 30 Intel 80386 microprocessors in parallel, they deliver over 100

MIPS of pure power, without hesitation. Naturally, all meet the existing and emerging world standards from UNIX, MS-DOS and OS/2 to all mainline 4th generation languages and SQL database management systems. So, it is little surprise that Apricot already has more networks installed in the UK than any other company. Or that it is the major supplier of desktop systems to the Government — as well as leading the world in financial systems for investment management. With all this supported by the UK's most innovative Research and Development centre - working closely with many major users in developing superior long-term computing strategies. You can begin to appreciate that the overall story is far too big to tell on a single page. So let us send you details on the complete range from Britain's largest

microprocessor systems, software and services group. Call free of charge on 0800 900 900, at any time. Because nowhere else in the world will you find so much, working so hard, so easily.

1. 小型機構 配

Does it bother you that the owner's role in a building project is just to lie back and open his wallet?

If so, we have encouraging news for you. We offer a way where you, the owner, stay in control. Where you know exactly what you are getting and what it will cost.

Only, you get it faster and at a lower cost. We cut project time by many months or even years. We cut costs dramatically. And we offer you all the security of a total contract.

Is it surprising that our method attracts intelligent corporations like IBM, Canon, Scandinavian Airlines, Norsk Data, Data General, Astra...?

For the conventional mind, however, there are drawbacks.

We don't give a lump sum bid on your project, nor do we enter into incentive contracts.

We don't because it hurts your project. You are forced to take too many decisions too early, something that only leads to unnecessary costs. Even worse, it turns you and us into adversaries instead of partners.

What is the alternative?

You hire us for a fixed fee to manage your project. In the package you get all the specialists, data programs, routines, skills and experience you need for your building project-just as if your own company was a fully-fledged building project manager.

While you're building we are part of your company. We are your partner.

How do we save time?

Normally, you go through a lengthy design and tendering phase before you can actually start building.

With us, the pre-project phase is much shorter, but it still gives you everything you need to make your decision about the investment.

All detail designs are made while we are actually building. We take decisions at the time they are needed. After all, it is quite feasible to decide on the roof construction while working on the foundations or erecting the structure of your building.

It is this simple approach that attracts intelligent companies.

How do we save money?

We make sure you're integrated down as

Your project is broken down into many contracts, which we buy for you from competing contractors. You only pay net prices.

In our system, contractors are not passive suppliers but active partners, able to influence the design and construction of their own work. Not only does this save money, it increases the quality of your project.

You won't get just five or six lump bids for your project, but several hundred bids for all the different parts of it.

And it's easy to cope with changes along the way. Contrary to the view portrayed by traditional contracting, changes are not necessarily costly.

What is our incentive?

We get our fixed fee. So why should we work like beavers to meet budgets and time schedules?

We seem to have chosen a very tough and unrewarding way to make money.

This is not so. We are professionals. Our motivation comes from participating in the creation of functional, yet beautiful, buildings-completed on time and within budget. What's more, we find satisfaction in our work.

Nowadays you may find this a bit hard to swallow.

On the other hand, it's very simple to find out what we are like. Our list of references includes everyone we've ever built for.

्रिक (भ्रम्भूत

Why did we come to the UK?

We believed that our method would have a future here. Our four years in the market have confirmed we were right.

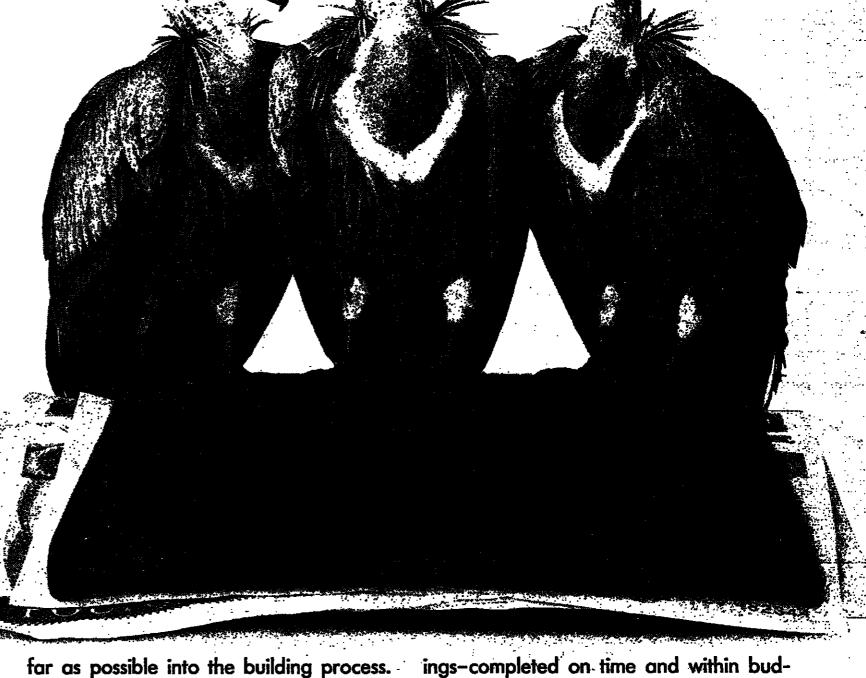

Today we are a growing British company eager to show our merits.

We know that an advert is not enough to convince you. But if you have read this far, why not ring us for a meeting.

It won't take more than an hour of your time for us to demonstrate how we can benefit you in your next building project.

Our aim is to give you a professional service which saves you time and money and gives you ultimate control.

The last thing we would want you to do is just lie back and open your wallet.

Åke Larson Construction Ltd., Kingsgate House, 536 King's Road, London SW10 OTE. Telephone: 01-3512211.

Japanese production of memory

Winning when the chips were down

Stefan Wagstyl reports on Toshiba's success in the race to mass produce the one megabyte microchip

Not any more. The plant's reptransformed by its success in beating the rest of Japanese

level of demand from computer ranks fifth among Japanese mak-makers, prices have soared to ers of this product. It had to jump Y2,000 (£3) each. Toshiba is reap ahead of the pack in developing ing huge profits with a rumoured the 1M chip, or risk being pushed

Toshiba gained its lead mainly beating the rest of Japanese industry in the race to mass produce the labest type of inicrochip, the one Megabyte DRAM (dynamic random access memory devices, with one quarter the capacity, had only just hit the market. Executives say this memory devices, with one quarter the waferstepper ter the capacity, had only just hit the market. Executives say this improved by calling on the context of the waferstepper ter the capacity, had only just hit the market. Executives say this improved by calling on the manufacturer of the waferstepper which prints images of the circuit design on to the allicon surface one chip at a time — to modify the equipment.

Also, operators were trained to work at higher levels of acceptable — first production targets, industry analysts, however, and meet production targets, industry analysts, however, and first produce 256K chips — it now alvested of second to the chip at barely half the produce 256K chips — it now alvested of acceptance of the limits to make the lines printed at each stage match with each other. Eventually, accuracy was improved by calling on the manufacturer of the waferstepper—which prints images of the circuit design on to the allicon surface one chip at a time — to modify the equipment.

Also, operators were trained to work at higher levels of acceptable acceptable acceptable and the production lines in the match of the 256Ks.

Industry analysts, however, and the production lines are the continuation of the says access was based on making many minor improvements, rather than on the continuation of the says there is never this; and so is ruthless self-discipline and so is ruthless and so is ruthless self-discipline and so is ruthless self-discipline and so is ruthless and so is ruthless self-discipline and so is ruthless and so is ruthless and so is ruthless sel because of a decision made three

satisfactorily, compared with an worthwhile because — as with an average yield in the industry of other Japanese companies — most recruits join Toshiba for Minra declines to discuss meth-

The company is supprised at the scale of the Oita Works' success, while its rivals including NEC, Hitachi, Pujitsh and Mitshibat they cannot each up before that they cannot each up before each of the year at the earliest. Prices are expected to fall them as supply begins to meet demand.

The IM DRAM is made on the same principles as previous gen.

 Capital investment. The plant has four semiconductor manufac bly, testing and quality control are all highly automated; computers control the factory's power supply. Toshiba has not stinted in equipping Oita Like other semiconductor makers, the group cut investment last year following a plunge in chip prices in 1986. But it still spent Y65bn — 60 per cent more than its nearest rival — most of it on 1M DRAM production equipment.

Following their coup in 1M DRAMs, engineers at Oita are planning their move into the next generation of chips – 4M DRAMs. The irony is that their success in 1M chips proves that they cannot be assured of win-

ning the 4M race as well.
Indeed, the story has a wider
moral: even in the highly competitive electronics industry, it is possible for a large company which has fallen behind in technology to catch up and even over

WORTH WATCHING Edited by Geoffrey Charlish

A question of improving quality

MAXIMISING quality in manu factured products remains one of the most important matters for **European industry.** Bradford University aims to make it easier for production people to recog-nise problems by developing expert systems, that is, computer systems which store and apply previous human experience.

Complexity is the usual barrier to understanding problem of quality. Often a manufacturing process can be so long and complex that it is difficult to pinpoint where something is going wrong. Even if the problem is identified, alteration of the offending part of the system can critically affect another part without the full implications

The Bradford project, backed by the Science and Engineering Research Council and the UK Government's Alvey project, will be carried out in conjunction with Lucas and the General Elec tric Company of the UK.

Limited expert systems, which can be used by shopfloor person-nel, will be developed first. nei, will be developed lirst.

Later, one system will build up a
picture of the production process's history, then another will
feed back the knowledge gained

Computing with a listening ruler

THE OPERATION of transferring dimensions from a drawing into a computer system has been made quicker and easier with a "sonic ruler", made by Science Accessories Corporation of Southport, Connecticut. It is available in the UK from P.M.S.

the drawing in turn, emits an ultrasonic signal which is picked up by a tiny microphone at each

covered by the ruler which

defines points to an accuracy of 0.1mm. It works in conjunction with an IRM or compatible per-sonal computer and costs £1,400.

into the design process. The idea is to to prevent problems arising in the first place.

(Instruments) of Maidenhead.

The ruler is laid along one edge of the drawing. A hand-held stylus, placed on each point in end of the ruler. The time taken for the signal

to reach the two ends allows ociated software to work out the two distances and so calculate, by geometry, the x and y co-ordinates of the stylus posi-

Belgian telephones to go digital

THE BELGIAN Post Office bas assigned the task of digitising the national telephone network to a Belgian subsidiary of Sie mens, ATEA NV. Digital equip ment for at least 480,000 sub scribers will be installed over

the next five years. The first lines will be in use at the end of September and the plan is to introduce an integrated services digital network (ISDN) using the Siemens EWSD system. It will then be possible for subscribers to exchange speech, text, pictures and data

Lifting the speed of a crane

MOBILE crane has been designed in Sweden which can be moved from place to place at speeds of up to 50km per hour (31mph) and can lift a four tonne oad at 25 metres radius.

The maker, Kranteamet of Sja-leved, says that MoDo, one of sweden's biggest pulp and paper makers, has been able to move loose timber and pulp at twice the rate obtainable with other

types of crane.

Power is provided by a turbocharged V8 diesel engine, which drives the hydraulic lifting sys-tem and provides road traction. A combined driving and controlline cabin is mounted on a separate jib and can be raised 10 which the company plans to metres above the ground to expand sales in Europe. metres above the ground to improve visibility. It is claimed that more precise manoeuvring is possible than with conver tional wire rope and pulley

Huntsman bags a sales success

RRITISH Telecom Enterprises has had an early sales success with its new Huntsman telecom network testing system. The sys tem will be supplied to Allied Lyons, the UK food company, which has more than 70 sites with exchanges connected by 200

The control centre will be at Burton-upon-Trent, the head-

quarters of Allied's communica tions group. A personal com-puter will be used to control the automatic daily testing, involving the placing of up to 700 test phone calls in which 13 types of fault will be sought, ranging from number unobtainable to unacceptable noise on the line. It s possible to detect potential faults before they become a prob-

IBM to open new lab in Japan

IBM is to open a technology application laboratory at its Yasu site in Japan. The aim is to improve the speed and effective-ness with which IBM applies semiconductor and electronic circuit packaging technology to

advanced products.

The Yasu laboratory will work closely with IBM's two other labs in Japan, in Tokyo and Yamato, and with the company's two manufacturing plants in Fujisawa and Yasu. The focus will be on chips and packages for small and medium sized processors used in workstatio

The European connection

DIGITAL Microwave Corporation (DMC) of San Jose in California, which makes microwave short-haul communications links and optical communications systems, has opened a design, manufacturing and marketing unit in East Kilbride, Scotland. It is expected that the plant will employ about 100 people by the end of a three-year period in

DMC has just signed a purchasing agreement with Mercury Communications, the UK common carrier competitor to Brit-ish Telecom, in which first year sales to Mercury are likely to

exceed \$18m (£19m).

DMC products integrate optical fibre and digital microwave components into small packages that allow organisations to inter-connect computers, telephone exchanges, data terminals and local area networks.

Collapsible bicycle knocks spots off earlier models

A BRITISH company, which has designed an innovative, grease-free, collapsible bicycle, has won a £345,000 order to

export more than 2,000 to Japan.
Already more than 8,000 Strida bicycles have been sold in the UK, US and the Netherlands. The Japanese order comes from the Seibn department store group. which will sell them through its Loft

Mark Sanders, 30, invented the Strida bicycle and his design was spotted at the Royal College of Art degree show by busi-

entrepreneur James Marshall in ness currepreneur sames Marshall in 1985. Together they set up a company called Strida to produce the machines with the aid of \$300,000 raised through private subscriptions to a Business Expansion Scheme.

The black bicycle is built around a tri-

angular aluminium frame with other components made of acetal nylon. It is designed for comfort rather than speed and has the handle bars higher than the saddle, so that the back and arms are straight when cycling. The "chain" is a

reinforced rubber drive belt, similar to the timing belts used in car engines.

Strida claims that the bicycle can be folded up ready for carrying in less than 10 seconds. When collapsed, it resembles a walking stick on wheels and, at 22 lbs, is easy to manoeuvre.

One of the machine's main features is its cleanness. The rubber chain requires no grease and no oily parts are expose SO OVETO

Harrods department store. It is now on show in London's Design Centre as well as being sold through some branches of Next and House of Fraser and through design-oriented shops, It retails in the UK Nick Green, marketing manager, says

production has reached full stretch, with about 400 cycles a week being turned out by the manufacturing subcontractor in Nottingham. Turnover is expected to reach £2m this year.

THE CONFERENCES TO THE CONFERENCES

25, 26 & 27 May

The theme of this year's EVCA symposium is the internationalisation of venture capital. European venture capital groups or those actively involved in advising entrepreneurs or venture capitalists should find the content of this year's programme of interest, particularly with the 1992 European Community harmonisation plans becoming relevant within the near future.

The themes of the symposium will include:

- Cross-Border Syndication
- Product & Process Internationalisation/Technology Transfer
- Venture Capital Networks
- International Fund Raising
- International Buyouts/Buyins
- Corporate VenturingInternational Exit Markets International Mergers & Acquisitions.

Speakers taking part:

Michiel A de Haan Chairman, EVCA Managing Director Atlas Venture Beheer BV

Alan Maynew Director SME Taskforce, EEC

Jos B Peeters Managing Director Benevent Management NV Guy de Jonquières International Business Editor Financial Times

John Cope, MP Minister of State for Employment

Klaus Nathusius Chairman Genes GmbH Venture Services Jacques Mécheri

Bank Mees & Hope. A genuine European Bank.

BANK MEES & HOPE NV

Amsterdam, Rotterdam, London, Hamburg.

February 1st 1953 is a date no Dutchman will ever forget.

Throughout the night, a fierce storm surge in the North Sea had been piled onshore by gale force winds.

Just before dawn, horrified observers in Zeeland saw the giant sea dyke suddenly bulge and crumble. By noon, vast tracts of the country were

under water. 2,000 people and 250,000 farm animals died.

In the aftermath, it was obvious that massive new sea defences were needed.

The question was how to anchor them in the treacherous shifting sands.

We provided the solution.

For years our fibres and polymers division had worked

on polyesters that were as strong as steel. Now they wove huge mats, flexible yet tough, which were ballasted onto the sea floor and meshed into the the dykes themselves.

Once in place the mats, and the dykes, were immovable.

This isn't our only contribution to Holland's well being.

We are one of the world's

biggest chemical companies, 68,000 strong, at work in 50 countries, involved in areas as diverse as car paints, catalysts and cancer research.

We're the world's leading producer of kidney dialysis membranes. And industrial yarns. Also, as it happens, salt.

Last year all this helped us turn over US\$8 billion.

Whichever way you look at it, we've helped lay the foundations of Holland's and the state of Holland's

CONTRACTS

£14m oil rig orders

HIGHLAND FABRICATORS has won £14m of contracts from Amoco Exploration in connection with three North Sea oil and gas development projects, writes Stepen Butler.

The Easter Ross fabrication yard will build a steel platform to be set in 300 feet of water at the Arbroath field in the central North Sea. This will be for an unmanned wellhead protector platform over the field, with pro-. cessing operations carried out at the Montrose platform, five miles to the north.

Total cost of the project is esti-mated at \$144m, with production expected in early 1990.

Additional jackets and piles are also to be built for the East Leman and indefatigable gas field in the southern gas basin of the North Sea. The structures are aimed at housing equipment for increasing the recoverable reserves in the fields, which are

Engineering orders for **Clugston**

Civil engineering works worth more than £3.5m have been won by Scunthorpe-based CLUGSTON CONSTRUCTION. Contracts valued at nearly a quarter of that sum have gone to the company's office in Peterborough. Split into three contracts, the work will be carried out for two clients, the Peterborough Development Cor-poration and Cambridgeshire County Council.

Biggest single contract is the £440,000 job to construct drainage and roadworks to develop the St Botolph area for the P.D.C. A 6 metres deep sewage pumping sta-tion is to be built and pulverized fuel ash grout used to fill in redundant sewers. Advance site works are under way for the same client at Orton, where new roads and drainage works are being installed under a £120,000

For Cambridgeshire County Council, the company has a £240,000 job at Caldecote, where an existing road on a residential development is being upgraded, together with its associated

A contract for £1,45m has been awarded by Clanford Borough Council for the replacement of 2km of sewers in deep open cut in Barton. A £640,000 contract for Severn Trent Water Authority involces refurbishment of the River Idle along 1,400 metres of its length. Another river project, this time for the British Waterways Board, has started on the Aire and Calder Navigation, where Chugston is to install some 600 tonnes of steel sheet piles and partially rebuild embankments.

Industrial foundations are to be built for Conoco at its Humber Refinery, South Killingholme, to support plant contained in the propylene plant. Worth £311,000, the work is to be completed in under four months,

Notice of Offer to Purchase for Cash All Outstanding Shares of Common Stock (Including the Associated Preferred Stock Purchase Rights)

Facet Enterprises, Inc.

\$32 Net Per Share

FE Acquisition, Inc. a wholly owned subsidiary of

Pennzoil Company

Notice of Special Tender Procedures for the 7% Convertible Subordinated Debentures due 2002

Facet Enterprises, Inc.

FE Acquisition, Inc., a Delaware corporation ("Purchaser") and a wholly owned subsidiary of Pennzoil Company, a Delaware corporation ("Pennzoil"), is offering to purchase all outstanding shares of common stock, par value \$1.00 per share (the "Shares"), of Facet Enterprises, Inc., a Delaware corporation (the "Company"), and the associated Preferred Stock Purchase Rights (the "Rights") issued pursuant to the Rights Agreement dated as of March 21, 1988 between the Company and Continental illinois National Bank and Trust Company of Chicago (the "Rights Agreement"), at \$32 per Share, net to the seller in cash, upon the terms and subject to the conditions set forth in the Offer to Purchase dated April 22, 1988 (the "Offer to Purchase") and in the related Letter of Transmittal (which together constitute the "Offer"). Unless the context otherwise requires, all references to Shares shall include all benefits that many to Shares shall include the associated Rights, and all references to such Rights shall include all benefits that may inure to the holders of Shares or to the holders of such Rights pursuant to the Rights Agreement. The Purchaser will purchase the Rights for no additional consideration and stockholders will be required to tender one Right for each Share tendered. Tendering stockholders will not be obligated to pay brokerage commissions or, except as set forth in Instruction 6 of the Letter of Transmittal, stock transfer taxes on the purchase of Shares by the Purchaser oursuant to the Offer.

The Purchaser is not offering to purchase any of the Company's 7% Convertible Subordinated Debentures due 2002 (the "Debentures") pursuant to the Offer. Holders of Debentures who wish to take advantage of the Offer may convert such Debentures into Shares in accordance with the terms of the related indenture and tender the Shares received upon conversion pursuant to the Offer. Holders of Debentures who wish to take advantage of the Offer may instead wish to do so in accordance with the special procedures set forth in the Offer to Purchase. Such holders may submit their Debentures, together with a properly completed and duly executed Notice of Conversion and Letter of Transmittal, as set forth in the Offer to Purchase. The conversion and forwarding agent will then arrange for the conversion of the Debentures and the tender of the Shares issued upon such conversion without the necessity of the holder presenting the Debentures for conversion in accordance with their terms. Debentures submitted for conversion and tender may be withdrawn at any time prior to such conversion. Debentures submitted for conversion and tender in the manner described in the Offer to Purchase will be converted by the conversion and forwarding agent only if the Offer is consummated and the Shares issued upon conversion of such Debentures are purchased by the Purchaser. If the Offer is not consummated, certificates for the Debentures will be returned to the holders presenting such Debentures for conversion and tender. Upon conversion, the Company will not make any payment or adjustment on account of interest accrued on the Debentures nor issue any fractional Shares. Cash payments in lieu of fractional Shares will be made in accordance with the terms of the Debentures.

THE OFFER AND WITHDRAWAL RIGHTS WILL EXPIRE AT 12:00 MIDNIGHT, NEW YORK CITY TIME, ON THURSDAY, MAY 19, 1988, UNLESS THE OFFER IS EXTENDED.

The Offer is being made pursuant to an Agreement and Plan of Merger dated as of April 17, 1988 (the "Merger Agreement") among Pennzoil, the Purchaser and the Company, pursuant to which, after completion of the Offer, and upon the terms and subject to the conditions of the Merger Agreement, the Purchaser will be merged with and into the Company (the "Merger"). At the effective time of the Merger, each Share then outstanding (other than Shares held by the Company as treasury stock or owned by Pennzoil, the Purchaser or any other subsidiary of Pennzoil, which will be cancelled, and other than Shares held by stockholders who have validly exercised any zights if any under Delaware law) will be converted into the cicht to making 522 in validly exercised appraisal rights, if any, under Delaware law) will be converted into the right to receive \$32 in cash, or such higher price paid per Share by the Purchaser pursuant to the Offer, without interest. The Company will be the surviving corporation in the Merger and become a wholly owned subsidiary of Pennzoil.

THE BOARD OF DIRECTORS OF FACET ENTERPRISES, INC. HAS UNANIMOUSLY APPROVED THE OFFER AND DETERMINED THAT THE OFFER AND THE MERGER ARE FAIR TO AND IN THE BEST INTERESTS OF THE STOCKHOLDERS OF FACET ENTERPRISES, INC. AND RECOMMENDS THAT STOCKHOLDERS ACCEPT THE OFFER AND TENDER THEIR SHARES PURSUANT THERETO.

The Offer is conditioned upon, among other things, there being validly tendered and not withthawn a nur of Shares equal to not less than 50% of the Shares outstanding on a fully diluted basis.

The Purchaser expressly reserves the right, in its sole discretion, at any time or from time to time, to extend the period of time during which the Offer is open by giving oral or written notice of such extension to the Depositary and making public announcement thereof no later than 9:00 a.m., New York City time, on the next business day after the previously scheduled Expiration Date. The term "Expiration Date" means 12:00 Midnight, New York City time, on Thursday, May 19, 1988, unless and until the Purchaser, in its sole discretion (except as limited by the Merger Agreement), shall have extended the period of time during which the Offer is open, in which event the term "Expiration Date" shall mean the latest time and date at which the Offer as so extended by the Purchaser

The Offer to Purchase and the related Letter of Transmittal contain important information which should be read before any decision is made with respect to the Offer.

Requests for copies of the Offer to Purchase and the related Letter of Transmittal and other tender offer materials may be directed to the Information Agent as set forth below and will be furnished promptly, at the Purchaser's expense. The Purchaser will not pay any fees or commissions to any broker or dealer or any other person for soliciting tenders of Shares pursuant to the Offer.

The Information Agent for the Offer is:

May 10, 1988

And yet the Kast End has a long history of acting as a step-ping stone to a better life for immigrants, such as the Huguenots and Continental Jews. The latest in this long line of immi-grants are the Bangladeshis and

To help these people overcome their problems and establish their independence, Spitalfields and the surrounding borough of Tower Hamlets have become the target for a wealth of pro-grammes aimed at promoting enterprise. A range of initiatives has also been set up to enable them to help themselves.

From a converted furniture fac-tory in Brick Lane, the Spital-fields Small Business Association operates a hand-holding service operates a nand-noming service for local small businesspeople; the nearby Tower Hamlets Cen-tre for Small Business provides advice and counselling for busi-nesses throughout the borough; while the Government has chosen Spitalfields for its third Lon-don Task Force area with initial funding of £306,000 for 12 pro-

jects.

have been used to back a range of start-ups. They include not just those in the traditional immigrant areas of clothing, leatherwear, catering and retailing, but also a computer agency, a jewellery manufacturer and car

Creating greater diversity in the Spitalfields business community is an important aim of the various aid programmes. "We try and tempt them to learn new and tempt them to learn new skills," says Ali Barlas, an advisor with Business in the Community runs a scheme whereby two Bangiansky, which channels private section has deshis based at the Tower Hambert Bangiansky and the school of the scho sor with Business in the Commu-nity, which channels private sec-tor help to communities in need. There is too much overtrading and undercutting in the traditional areas."

Africa, many people in Spitalfields come from the Sylhet area of Bangladesh, a rural community with no strong commercial tradition.

the Tower Hamlets centre both run training courses in subjects such as book-keeping and marketing. One course combined machining skills with English language tuition.

Language is becoming less of a problem for the younger genera-tion of Bangladeshis who have spent some time in schools in Britain but for older people, dealing with British Telecom about faulty telephone lines and with the local authority about blocked drains and rates, it can be diffi-

in their own language and go out to advise those who might not be reached by more conventional

attacks does impinge on some areas of business life.

The Government's task force programme has helped to buy a minibus to take people to evening courses at the Adult Education Institute at the other end of the borough. This was needed to overcome fears about using pub-lic transport late at night.

Even when an entrepreneur has raised finance and done the training he will have to find premises. Conditions in many of the local workshops are appall-The two-man pleating business

run by Ezra Raymond and his partner is based in a single room off Brick Lane. Scaffolding props up the door frame and fungus sprouts on one inside wall. Raymond's business is in a row of workshops which is now being

improved by the small business association. "Moving to new premises stimulates a willingness to change," says Kay Jordan. "People look at their equipment and their methods of produc-

The association owns 54 workshop units though only 35 are currently in use. It could probably raise private sector funds to speed up the modernisation pro-cess but this might force it to charge rents which many poten-tial tenants could not afford, she

adds.

How successful have these ini-How successful have these initiatives been? The BIS's two Bangladeshi workers have given 428 counselling sessions, reports Ali Barlas. This has helped seven people into self-employment; led a further 12 to take a training course and persuaded three people that employment is a more realistic content. realistic option. A further seven businesses have been given help in raising finance. These numbers appear small but in an area with as many problems as Spital-fields progress will be slow. The Tower Hamlets centre says

it helped create or protect 1,200 jobs in 1987. Of the people who started up in business on the centre's advice 89 per cent were still in business after a year - a survival rate which compares well with that of other enterprise

Stephen Lord, who handles these projects at Business in the Community, believes the current small-scale approach is the right one. "Millions of pounds have been spent on these areas with-out effect in the past," he says. "You have to involve the local community to deal with its prob-

Franchising

Have pizza – will travel

Chris Sherwell reports on an Australian entrepreneur who, four years after starting his business, now has global ambitions

They are a mobile advertisement - as well as a key compo-nent - of a home-delivery pizza service which is the brainchild of one of Australia's newest entrepreneurs. They also exemplify how, by franchising a novel idea, a business can expand very rap-

idly. Since 1984, 38-year-old Richard Wescombe has not only spawned more than 100 outlets at home, but nine in New Zealand, seven in Japan and (so far) one in

Britain. His business is called Dial-a-Dino's, and while this has a friendly Italian ring to it, both the business and the pizza – and for that matter the story behind its expansion - are very much

It starts in sleepy Adelaide, from which city Wescombe hails. He had already tried working in ladies' hairdressing, a milk bar, the timber business, sheep shearing, truck driving and as a parole officer before Dial-a-Dino's mate-

"I wanted to start up a big business and I wanted control," he says. "I wanted to leave a mark somewhere — to do some-thing well and be respected for it." In three-and-a-half years, he has built an operation which generates revenues of more than A\$55m a year. Since introducing his pizza concept in Australia, he has seen his idea copied in every major city.

That it was pizzas at all, he now says, was an accident. He saw a character in Leave it to Beaver, the US children's television series, ring for one, and he decided it was a good idea, especially as there was no such service in Adelaide. He began the business as

Dino's Dial-a-Pizza with four others - his brother, a microbiologist described by Wescombe as the "hrains behind the dough," his father-in-law, who looked after the books, and two other partners, brothers who did the cooking

The gimmick of a car with a phone on its roof also came from the US, while the service itself was promoted through letter-box drops. Although the team protec-

outlet was opened. A third began two weeks later, a fourth another two weeks after that, all funded with the cash flow of the earlier ones. Soon the whole of eastern Adelaide was covered.

The big break, according to Wescombe, came in July 1985
when, with seven outlets open,
someone - perhaps a rival claimed that Dino's vans were
infringeing the law by having the

A quick word from Wescombe in the ear of a friendly radio jour-nalist, and this attack on a small business became big news, prompting press articles and edi-torials. At one point Wescombe parked 24 vans outside the state parliament in protest. After the free publicity came the obvious romise: a dimmed roof light.

Opportunities for expansion

caused Wescombe to change the name of his business. At the same time he shifted into franchising, for it was here that the big opportunities for expansion

lay.

Wescombe felt he had the basic formula right for success in bome-delivered fast food: a good product and good service. Dial-a-Dino's, he says, aims to deliver, with a smile, a freshly-made bot pizza within 30 minutes of it being ordered.

being ordered.

The pizzas are made from a special recipe dough, a distinct tomato puree and a specially-made cheese. Because a lot can go wrong in baking them, Wescombe employs the KISS principle (Keep it Simple, Stupid): the pizza bases are made, rolled and part-baked at a central point in each major metropolitan selling each major metropolitan selling area. From the outlets where they are finally baked, the pizzas are delivered in an insulated pouch by young drivers in yellow and red uniforms which match their cars.

FAST FOOD fanatics in south London may have seen an unusual sight on their streets recently; canary yellow mini-cars with large scarlet telephone handles on their roofs.

They are a mobile advertise
tively opened a pizza restaurant about A\$100,000 to get started. This is made up of a one-off A\$29,000 franchise fee, and another A\$20,000 franchise fee, and outlet was opened A third began outlet was opened A third began two weeks later, a fourth another

Wescombe says franchisees are picked carefully: they must be suited to providing a good service, not chosen because they have the money. To maintain standards, he has devised a five-point Dino's credo. He also includes at least one directly-owned company outlet in each major market area, and he employs a franchise manager to

major market area, and he employs a franchise manager to cover every eight outlets.

A franchises needs a minimum turnover of around A\$4,750 a week to survive. The average is A\$8,000 a week, while the best organised, says Wescombe, manage A\$18,000. Those who are successful over other stores in adiacessful open other stores in adja-cent areas. expanding the business in what is called a "cha-

ter franchise.
Wescombe takes a hefty 8 per cent of weekly turnover in royal-ties and another 5 per cent for the all-important promotion and It was his move into Victoria marketing of the product and the and a clash in Melbourne with a service.

He has yet to break into the

Brishane market in Queensland, where the US company Domino's has built up a similar business, while in Western Australia he has linked up with a local com-

pany.

This is a move he has duplicated in expanding abroad. Diala-Dino's International has taken a 25 or 30 per cent stake of ventures with local partners. New Zealand was first, then Japan (last August). ----

He has since turned his attention to the UK and now has his eyes on the Continent, in particular the Benehux countries, West Germany and Spain.

Is it time to go public? "I still-want control," Wescombe says. "Franchising is a personality business, and I have a responsiof our success. But I would like to get my money out eventually."
What about his partners! Wes-

combe now has only one, Kevin Payne, having bought out his brother and his father in-law, and the two others as well - they Under Wescombe's franchising decided to use a Dial-a-Dino's arrangements, franchisees - he franchise operation to build a calls them "owners" - need successful restaurant business.

The last day of the latest of the
London Sinfonietta's "Response"
weekends was devoted to a single plan: rare Szymanowski music composer, and to a single, large-scale work. Heinz Holliger for very high soprano in the mid-die of each half, after something newish and Eastern and before the peerless oboist of his day, but something by Xenakis. One he has pursued a parallel though intended Eastern component was less celebrated career as a commissing - Edison Denisov's Chamber Symphony isn't finished yet - but Ligeti's almost-familiar Melodien filled the gap with its deliquescent appeal and soft, sub-

Born in 1939, he studied compo sition with Boulez, and one of his relatively early works, the impressive Siebengesang, was at one time widely available here on Just before his ravishing First record. But live performances of bis music in Britain have been record. But live performances of nowski wrote the op.31 Songs of a extremely rare, and we have Fairy Princess for his coloratura heard almost nothing of his Fairy Princess for his coloratura heard almost nothing of his sister, who must have been development since the mid 1970s, remarkably accomplished. She a period dominated by the concould hardly have surpassed position of the Scardanelli Zyk-Bileen Hulse here. I have never heard this set delivered with associated lectures and a film, made up the Sinfonietta's demanding programme of after-

just before - but much smaller and more effective than - his day.
The cycle of pieces, calling in neo-nationalist ballet-pantomime sum for a solo flute, chamber orchestra and mixed chorus, is ailt around the life and work of melled glitter of op.31, John Con-stable had been reliably intellithe German romantic poet Holderlin: Scardanelli was one of the gent but a touch dry. The noms de phane behind which he hid the authorship of his poems. pietonie not only sounded magical but showed how well Szyma-Holliger is thus part of a whole cadre of contemporary central nowski had learned from Stravin-European composers lately drawn to Hölderlin for inspirasky's new economy – and from his Nightingale. tion that also includes both Nono and Henze. Holliger's immersion in the strangely detached expres-sive world has been more contin-uous and profound than any. Recent Xenakis, his 1984 Thallein and the new Waarg bobbed lumpishly in the wake of highmiddle Szymanowski. For some reason Xenakis has taken up old however, composition of parts of and obvious methods of constructhe cycle has occupied ten years, tion (rather like recent Penderfrom 1975-1984, and including ecki), bald enough to suggest alongside settings of some of the poems - grouped into 12 songs for a coppella choir and known collectively as Die Jahreszeiten A Triple Sextet (1980) by György Orbán seized the imagination with superior efficiency (1975-78) - a collection of sateland wit. What looks on paper like lite instrumental pieces, the dogged minimalism proved to move lightly and obliquely, with Ubungen zu Scardanelli(1975-85), a substantial work for solo flute, elegant swiftness and not a limp tair)e(1978-83), and several movemoment. Orban's inventions for ments from Turm-musik, for his oddest sextet (mixed keyflute, chamber orchestra and tape (1984), which was beard at the Huddersfield Festival two years boards, harp, cembalo and per-

> Holliger allows the components of the Scardanelli Zyklus to be presented in assorted ways, and the Sinfonietta's performance followed a sequence devised by the conductor Terry Edwards, in consultation with the composer. It fell into three independent parts, each containing four of the verse settings, and a selection of the instrumental pieces that comment upon or amplify them, together with one of the more substantial works involving solo flute. The flute works - "Bruchstücke" and "Glocken-Alphabet" from Turm-Musik, and t(air)e emerged with the strongest charthe elements of sound and texture that bring Holliger's music into that border land between music and noise so thoroughly exploited by Lachenmann. The vocal writing, though, proved to be surprisingly austere - highly canonic and often with a Webern-like sparseness, a simi-larity enhanced at times by the

nings.

What impact the cycle as a whole provided was achieved simply by remosseless accretion. The patchwork of vocal techniques and instrumental treatments seemed concerned more with trawling across musical styles for technical ends than in any real attempt to illuminate Hölderlin's extraordinary life and art. The essence of the poet was as remote at the end of the even-ing as at the beginning; the texts merely remained pegs on which the compositional exercises were hung. In immersing himself such a rarefied world Holliger appears to have lost much of the communicative power of his music; while it remains expertly written (and apparently expertly realised here by the London Sinfonietta and Sinfonietta Voices under new resources of harmonic and Edwards, with the superb flautist lawski's language. His example Aurèle Nicolet) it has become totally forbidding in perfor-(like his presence throughout totally Saturday's events, whether as mance.

The price of a single market

THERE ARE two main messages about 1992, the in the economic analysis by the Brussels Commission of the As the study European Community's plan to create a single market by 1992. One is that if the EC limits itself to dismantling internal trade barriers, it will forgo a major oppor-tunity to boost growth. The other is that realising the longer-term gains of further integration will entail painful short-term dislocations and sacrifices.

The study estimates that just

removing barriers will yield some worthwhile benefits. However, it argues that these can be much increased if governments take advantage of the extra resources released to adopt more expan-sionary macro-economic policies. The large margin of error in

the study's projections means they can be only a rough guide. But they do suggest that in a genuine single market there will be room for West Germany, in particular, to take a more refla-tionary stance without risking automatically a higher budget deficit and inflation rate.

The corollary is that EC governments' economic policies must converge more closely. That is another way of saying that scope for national autonomy will be reduced. Indeed, the study argues that, even without agree-ment to stimulate demand, the risk of greater currency instabil-ity in a single market is likely to impel tighter monetary co-ordina-

Lesson for UK

There is a lesson here, particu-larly for countries like Britain, which seem convinced that they can get the full benefits of a single market on the cheap, just by harmonising such things as light-bulbs without conceding any traditional sovereign prerog-

should deflate some of European industry's current public relations euphoria about 1992. It gives warning repeatedly that transition to a single market will involve harsh dislocations and short-term job losses as more efficient firms squeeze out less com-petitive ones. That should be self-evident: the overall gains from an economically more dynamic EC do not mean imme-put the common interests of the diate and equal gains for all. Yet whole Community above those of judging by the overwhelming narrow national and sectional optimism in European business constituencies.

As the study points out, progress towards a single market will be frustrated if governments react by sheltering feeble sectors and companies from stiffer com-petition. However, it arguably under-estimates the strength of political and trade union resistance to adjustment. Specific short-term actions may be needed - for example, to assist retraining of redundant workers - in addition to the broadly expan-

urged by the study.
Such measures could also be off pressures to ring the single market with barriers against third countries, notably the US and Japan. This is where the study is least satisfactory. In an attempt to paper over divisions between EC governments, it descends into bureaucratic double. Speck about trade reciprocity. ble speak about trade reciprocity and "European preference." This obfuscation sits awk-

wardly with the study's other-wise uncompromising insistence on vigorous competition and ease of market entry. As 1992 approaches, the EC needs to resist siren calls from industry for more systematic external pro-tection and corporatist industrial strategies. To accede to them would not only invite internawould not only invite interna-tional retaliation, it would per-petuate the very inefficiencies which a single market is intended to eliminate. Further-more, the suggestion implicit in such demands – that dominance of an integrated EC market by Europe's major industries is Europe's major industries is enough to ensure their viability is nonsense in an era of global

competition.

Overall, however, the study argues persuasively that while the potential benefits of a single market are big, they do not come free of charge. The richer the rewards, the higher the price in terms of political flexibility and construct adjustment. That price structural adjustment. That price is likely to rise still further if economic conditions in the EC deteriorate sharply in the medium term. However compel ling the arguments for further European integration, its achievement calls for courage, determination and a readiness to put the common interests of the

Peace hopes in southern Africa

ANYONE WHO has followed the tortuous diplomatic efforts over the past decade to bring independent indeed the case, the basis of a negotiated settlement is already dence to Namibia (South-west on the table. And perhaps most Africa) and peace to Angola, will important of all, there is what Dr be sceptical about the prospects Crocker called an "evolving" US for a successful outcome to the and Soviet joint interest in current negotiations.

Ian Davidson looks at the way ahead for France after the election

A consensus around the centre

TENS OF thousands of Parisians, mostly young, many coloured, crowded into the streets to demonstrate their enthusiasm for Francois Mitterrand's crushing victory in the presidential elections. The celebrations lasted until the early hours yesterday. Arm-in-arm in the roadway, or crowded on the roofs of mini-vans, flags waving and klaxons blaring, they pressed towards the Place de la République and a pop concert laid on by the Socialist Party as the centre-piece of the festivities. The din was frightful, the night was warm, the mood was friendly; not a policeman was to be seen.

It was in many ways a surprising denouement to a distasteful election campaign. Surprising, because this popular exultation over the defeat of Mr Jacques Chirac and his neo-Gaullist RPR party recalled that other occasion, seven years ago, when Mr Mitterrand's supporters danced in the streets to mark their delight with his first presi-dential election victory, over Mr Valery Giscard d'Estaing, and the end of 23 years in opposition. Yet so much has changed since then, that it was difficult to believe that the crowds were chant-

ing the name of the same president.
After the roller-coaster in Mr Mitter-rand's popularity and the brutal abandonment of the unreconstructed socialist policies which had caused such joyful optimism seven years ago, after two years of *cohabitation* in which his role as President was severely squeezed by the right-wing government which came to power in 1986, few would have expected that Mr Mitterrand could secure an even more triumphant sec-ond victory. In one respect, Sunday night's cele-

brations were different. Traditionally, French Socialists celebrate at the Place de la Bastille, and that is where they celebrated Mr Mitterrand's first victory in 1981. The Place de la République, by contrast, does not carry the same political vibrations and its selection for Sun-day night's concert initially caused some confusion among the party faithswarmed towards the Bastille.

The choice was probably strictly practical: La République offers a larger open space for the deployment of the music stages and giant television relay screens which have been such a feature of this election campaign. But political wags have detected a political signifi-cance in the switch of venue, which they interpret as the transition from the Revolution to the Constitution, the outward symbolism of the contrast wing programme of 1981 and the cau-tious pragmatism of his centre-left pro-

In view of the undertone of anxiety over France's economic problems, which were a constant background theme in the electioneering of all the major candidates, the undiluted delight of Mr Mitterrand's supporters seems over-stated or even misplaced. In the cold light of a rainy Monday morning,

Cecchini's new

Europe

has offered no easy solutions and few clear recipes for France's difficulties. Nor, for that matter, did Mr Chirac or Mr Raymond Barre; but Mr Mitter-rand's 54-46 margin of victory over Mr

Chirac is far greater than the differences in their programmes.

If the French gave Mr Mitterrand such a smashing victory, no doubt they were voting at least as much against Mr Chirac as for Mr Mitterrand, at the end of a campaign which became increasingly bitter and discreditable as the weeks wore on.

Events first started to take a turn for

the worse on after the first round of voting two weeks ago, when it emerged that Mr Jean-Marie Le Pen, leader of the extreme right-wing National Front had made a historic breakthrough with more than 14 per cent of the vote. Mr Chirac, by contrast, had come a poor second to Mr Mitterrand, and his ambitions of embarking on the final stretch of the campaign as the undisputed leader of the right, were in tatters. From that moment on the right-wing

campaign started to go sour. Many poli-ticians of the centre and right have laid the original blame on Mr Mitterrand's Socialist government, for having introduced the proportional voting rules which in 1986 enabled the National Front to secure, for the first time, a substantial representation in the National Assembly. Whatever the rights and wrongs of that charge, it seems obvious from the substantial increase in Mr Le Pen's vote in the past increase in Mr Le Pen's vote in the past two years that there is an abscess of fear and protest which has not been lanced by the "respectable" parties. Over the past two weeks Mr Chirac and Mr Charles Pasqua, his populist campaign manager, have been making desperate attempts to lurch towards the tight to meantum the patters who des-

right to recapture the voters who des-erted to Mr Le Pen and the process has been marked by a series of coups de théatre, which were flagrantly electoral in purpose, but which, in aggregate, cast little credit on France or its Gov-The return of the three French hos-

tages from Lebanon, the release by force of 23 French hostages held by militant dissidents in New Caledonia, at the cost of 21 lives, the repatriation of Capt Dominique Prieur from deten-tion on the Pacific island of Hao, all smacked of cynical manipulation of public ominion

On the eve of voting, the Gaullists held a rally in the Place de la Concorde, for the "defence of the Fifth Republic," were threatened by revolutionaries; and as if by accident, rumours spread on Saturday that the Interior Ministry had conducted secret polls showing Mr Chirac as the victor with just over 50 per cent.
As a result of these coups, Mr Mitter

rand now has at least three diplomatic problems on his hands, in addition to the task of forming a centre-left government in a National Assembly which

have demonstrated that the French electorate was not impressed and may well have been alienated by the right-ward lurch in Mr Chirac's campaign. For weeks if not months, a Mitterrand victory was favoured by all the opinion polls; Mr Chirac's essential requirement was to come a sufficiently close second to "save the furniture," as the French say. If he could not win, he needed to remain the undisputed cham-pion of the French right. in the event, the magnitude of his

defeat has dealt a series of heavy blows to his ambitions. Historically, Mr Charles Pasqua may be right in believing that Gaullism had its roots in populism, but those roots may have withered for lack of a leader of heroic stature. If Mr Chirac reckoned that his best bet lay in a populist response to a populist challenge, just as his predeces-sors responded to the challenge of May '68 twenty years ago, he miscalculated badly. This has been the most serious defeat for the French right in the 30year history of the Fifth Republic and it seems to suggest what many have sus-pected: that while Bonapartism may be a durable strand in the spectrum of the French right, it may not be a dominant strand without the charisma of a Bona-

Mr Chirac's tactic of trying to woo Mr Le Pen's 14 per cent seems to have backfired, as many people predicted it would. Some leading centrist and cen-tre-right politicians, who gave barely formal support to Mr Chirac while the campaign lasted, began to respond cautiously but positively to Mr Mitterrand's overtures as soon as the returns started to come in. Mr Barre expressed the hope that Mr Mitterrand would conduct his new mandate in such a way as to unite the French people, and former President Giscard d'Estaing made clear that he would not automatically cen-

but would judge it case by case.

The relative open-mindedness of some of the centrists to Mr Mitterrand's victory is understandable on two grounds: it is partly a flight from the political and civic dangers represented by the rise of Le Pen and the apparent ascendancy of the Pasqua thesis in the Gaullist party; and partly no doubt a desire to take Mr Mitterrand seriously when he says he wants to replace the sterile switchback of left-right argument with a more centrist and unifying approach. Mr Giscard d'Estaing has long argued that France needs to be

governed from the centre.
Yet the prospect of serious contacts between the centre-right and Mr Mitterrand's Socialists marks a paradoxical reversal of roles. In 1986, it was Mr Chirac who seized the opportunity of the right-wing victory in the general elections to form a government, even though it meant working with a Socialist President, whereas Mr Barre loudly denounced the evils of cohabitation. During this election campaign, it is Mr Chirac who has denounced cohabitation with increasing bitterness, whereas Mr Barre's language is beginning to sound akin to co-operation, even if it does not extend as far as a governmental agree-

return for policies they approve of. Moreover, the electoral rebuff suffered by Mr Chirac has evidently whetted the appetite of both Mr Barre and

respected figure from the past; and when Mr Barre was heading for defeat in the opinion polls, it was widely expected that he would go into retirement. Now the two men appear to be competing with each other in claiming a new leadership role in a revitalised and more united UDF grouping of can-

Yet if some of the centrists are apparently prepared to court Mr Mitterrand, it is not just cynical opportunism. Cohabitation imposed periodic strains between President Mitterrand and Prime Minister Chirac, but it also revealed — or helped reinforce — a new-found consensus between left and right on a wide range of defence and foreign policy issues. Just as Mr Mitterrand brought the Socialist Party round to support the Gaullist policy of nuclear deterrence, so Mr Chirac brought the Gaullists round to more enthusiastic support for the European Community.

respected figure from the past; and

This consensus was further extended the ran-up to the election, with all three main-stream candidates speaking in almost interchangeable terms about the necessity of managing the French the necessity of managing the French economy so as to improve competitive ness, about the challenge of the EUs single market after 1952, the need for a Kuropean currency and central bank, and the overriding priority of strengthening France's training and education systems.

The fact that this consensus was expressed by all three in terms of vague generalities may have helped drive the protest vote into the arms of Mr Lear Pen, but on the evidence of political e rhetoric, at least, the campaign has suggested that, for 70 per cent of the French electorate, most of the old ideo logical arguments are out-of-date. H Gaullism is hollow, the Communist Party has shrivelled to insignificance.

This consensus does not necessarily mean that France will be easier to gov-ern. For better or worse, it is stuck with a constitution which was designed for a particular leader in particular circumstances. Nor does the consensus mean that France's problems will be easier to solve. But it may suggest that Mr Le Pen's 14 per cent is not the only significant fact about the 1988 presidential election.

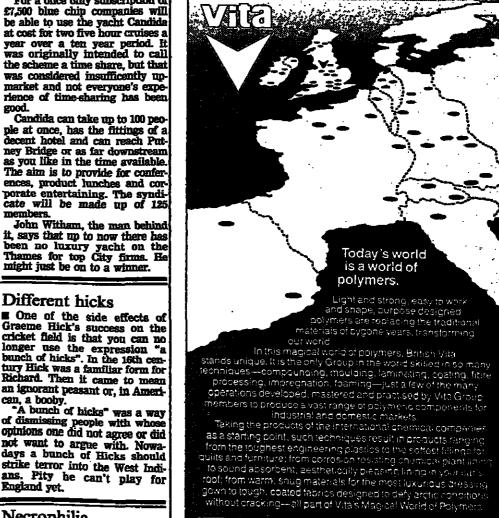

Suc

The paradox is, of course, partly skin-deep, and has as much to do with opportunity as motive. In 1986, Mr Chirac thought that two years as Prime Minister would strengthen his credibil-ity as candidate for the presidency; whereas Mr Barre was not a party leader, and could not claim the prime ministership even if he had wanted it. Today Mr Chirac is forced to denounce bring him any closer to the presidency; whereas Mr Barre and Mr Giscard d'Estaing are free to trade their support in

Mr Giscard d'Estaing for heavier roles. After his defeat in the 1981 presidential election, Mr Giscard d'Estaing has sometimes been written off as a

From Mr Frank Field MP Charles Hodgson's arricle on the proposals put forward by the Adam Smith fratitute and the Centre for Policy Stadies to the Social Services Select Committee (FF 1887 3) incluses the ficance of the evolutionary nature of these proposals to some extent. I, for one, was genninely surprised by the careful, even conservative, attitude of those who advocated reform of the National Health Service (NHS) at the meeting on May 4.

Instead of the anticipated blue-

print for a total re-organisation of the health service, the plans pres-ented were for a number of limited experiments at a local health authority level. There were in fact two proposals. These got somewhat confused.

The Adam Smith Institute recommended the establishment of Health Management Units (HMIs), which would replace the family practitioner committees From Mr Ion Johnston.
and both the district and the Sir, On May 3 you rep regional health authorities. The Centre for Policy Studies advo-

allowing competition between MHCOs, and putting these changes into effect more widely. It is not so much that the changes proposed are not radical - they undoubtedly are. It is more that, judging by yesterday's presentations, if such changes From Mr L.T. An authenticated source of information

From Mr Amory Pakenham-

Sir, Tom Lyon argues (April 26) from his Union of Independent Companies that because the small company environment in the US is freer than in the UK, and countries like Australia, (who will have the statutory France, West Germany, Italy and Japan do not suffer from not having a legal requirement for small companies to have their accounts audited, the UK and (presumably) Ireland should allow the ctors and shareholders to decide about auditing the accounts on the basis of commercial need (undefined).

His argument puts andited accounts into the category of advertising and propaganda, ignoring interests which differ shed that Britain left behind in so many parts of the world. And those who own the companies. I refer specifically to employees, suppliers, and customers whose good relationships with the company are crucial to its prometry. There Britain did not just fail to resolve an intercommunal congroup of relationships with the company are crucial to its prometry. pany are crucial to its prosperity and endurance on the business

These persons are surely entitled to an authenticated source of information — such as that offered by professionally audited accounts — about income and career prospects, revenue, and supply continuity. Directors, too, can benefit from the impartial review of economic perfo and financial viability. Amory Pakenham-Walsh,

Military Road, Killiney, County Dublin, Republic of Ireland

L'expression de ma considération

From Ms Joan Lancroanal Sir, Our letter endings somewhat simpler than the French (Letters, May 3), but they can still give cause for thought. Some years ago my French boss gave me a handwritten draft letter to type which he had candidly ended: "Yours truthfully." Joan Langrognat, 6 Oxford Road, Harrow, Middlesex

Report of her death much exaggerated

From Mr Graham Willmington. Sir, Friends of Mrs Char were deeply distressed to read premature reports of her death ("Whitehall tea ladies pour their final cuppas," May 3). The lady is very ch alive and well in London to be precise, at New Court, 48 Carey Street, WC2.

There she wheels her trolley and tinkles her bell twice daily to dispense tea, coffee, buns and biscuits to staff of the Monopolies and Mergers Commission, the Inland Revenue, the Department of Health and Social Security, and the Paris and Oslo Commis

Graham Willmington, 19 Upper Tooting Park, SW17.

Ce n'est pas la même chose

From Mr Graeme Ward.

Sir, In his letter (April 20), Mr

I.A. Nassim inquired why
French retailers paid a much
lower sales commission to credit
card issuers than UK retailers.

He compared the French average merchant service charge of periods); merchant service charges of periods); merchant service charges:

Any bank manhamatical and the property of the periods of the period of the periods of 2.5 per cent with an average, charges; and charges to carrent in the UK in France, charges; and charges to carrent in the UK in France, charges; and charges to carrent in the banks in the banks bottom Bancaire (CB) scheme can contract any retailer to accept CB impact on the banks' bottom cards, which may be affiliated to lines shows a fair degree of correlation. So far as the UK is concerned, the Monopolles and Mergonly Barclaycard and the Joint Credit Card Company (Access) contract retailers to accept Visa and MasterCard respectively. Thus the answer to his question is chosen, the impact on the banks' bottom lines shows a fair degree of correlation. So far as the UK is concerned, the Monopolles and Mergonly Barclaycard and the Joint Credit Card Company (Access) the position and should report next year.

It will be interesting to see how these more in the competitiveness are resolved, under the recently proposed for Krench banks than in the mili-

School of Mathemanics, actuarial lies more in the competitiveness under the recently proposed Science and Statistics.

Of French banks than in the milituropean Banking Accord, by tancy of French retailers.

However, the differences do not end there. The French cards are not strictly "credit" cards, for letters to the Editor should but "deferred debit" cards, for the Editor should include, where possible, a day time telephone enables.

It intended for publication, but "deferred debit" cards, for the Editor should include, where possible, a day time telephone enables.

It pays to increase your Gower power

From Mr John Griffith.
Sir, Two — and only two — cheers for the report of the committee of inquiry into the teaching of English language. In such a work one expects at least blameless, if not scintillating English, but to judge from the extract printed (FT, April 3) we must be content with ungainly verbal pinchbeck:
....speakers may be rightly
proud of their regional pronunciation, which identifies (my italics) where they come from Sir John Kingman and his illustrious colleagues should be made to copy out 50 times in their own handwriting all the dictionary-definitions they can find of the verb to indicate.

gees of 1948 vintage, stayed put. Just as every Israeli knows about the Shoah (Holocaust), every Palestinian knows about the Nakba. And if the lesson of the former is that Jews are never safe unless in their own state defended by their own army, the lesson of the latter is that no Palestinian must voluntarily leave his home and his land.

If one thing is certain about the future of the occupied territories, it is that the Arab population will not leave voluntarily. If Israelis decide that their task of istacts treath that their days to holding the West Bank and Gaza needs to be "simplified" as was that of 1948 by the departure of the bulk of the Arab population. they will have to use violence and coercion on a much greater

scale than in 1948. Even to mention such a possibility in a British newspaper will no doubt sound to many like irresponsible anti-semitic scaremon-gering. But the idea that the soluthe map, because the new Jewish been the subject of bitter contro- from the extreme right led by the map, because the new Jewish state took the name Israel, while the Arab state proposed by the UN never came into being. This fact is usually blamed on the Palestinian leaders who rejected the partition proposal, but someone else had a lot to do with it: Abdullah ibn Hussein, the Hashmenite prince for whose benefit Churchill had created the emir-

are no longer willing to contrib-ute to the Israell economy by pro-viding cheap labour. Israell opin-ion will inevitably polarise between those who favour withdrawal and those who favour getting rid of the population. And left to themselves the majority of Israelis may well drift gradually towards the latter alternative.

The strongest argument against it, for the floating voter, would be the effect that such a development might have on Israel's relations with the United emirate of Transjordan. Then in 1937, with the Arab population of Palestine in open revolt (much as it is again now in the occupied territories), Britain sent out the Peel Commission which recommended a further partition. In international Relations at Oxford, traces the long and tortudid occur (the massacre at Deir vassin being the most notorious) has so often in the past got away with ignoring American warnings, and American politicians aged many Arabs to flee. The alleged broadcasts of Arab goving them to do not only the past got away with ignoring American politicians aged many Arabs to flee. The alleged broadcasts of Arab goving public that might sound like expression to the past got away with ignoring American politicians aged many Arabs to flee. Fuji Bank in US bond venture

Continued from Page 1 been seeking a place in the

inner circle for more than a year, hoped to become a pri-mary dealer this summer but now fears its application could be held up by the Fed until the end of the year. Mr Hitoshi Ishihara, manag-

ing director of the interna-tional division of Yamaichi, said: "They are very concerned about an oligopoly of Japanese dealers in the US. The Fed's move is very natural reaction

to this (feeling)." Mr Ishihara said Yamaichi had been a reporting - or appren-tice - dealer in the bond mar-ket since last July. Generally, promotion to primary dealer came after a year. "We could get the licence by July. But there is a possibility that it could be postponed until the end of the year."

Japanese banks have been shocked by the difficulties they have encountered making acquisitions of US financial

Mr Eddie George, the Bank director with responsibility for the gilt-edged market, said that he had no objections to Nomura starting to trade as an official market-maker, with privileged access to the Bank's dealing desk, at the start of May. Daiwa was scheduled to start operating

in early June. However, on Friday, April 29, the Bank told Nomura it would not be allowed to start trading after the weekend. Nomura decided to say nothing of the incident. The Bank said yester nese firms to become primary day it could give no indication as

have been successful in meeting pedalling on a commitment to did with Morton Thiokol, for offered a tenth of that for their technical requirements allow Japanese brokers to selected assets; or, as with the US non-voting shares - being urged all their technical requirements as far as the Bank is concerned, but there is also official policy on reciprocal trade policy," was the most that the Bank would say

What appears to have prompted a change of heart was a series of frustrating Anglo-Japanese meetings on opening up the Japanese financial markets over the last few weeks, in particular during the visit to Japan of Mr Geoffrey Littler, the leading Trea-sury official

So was the Treasury responsible for ordering the Bank to with-draw its approval? "The two firms have not been able to start trading when they wanted to, but beyond that we are not commenting," the Treasury said last night.

Treasury officials however pointed an accusing finger at Barclays de Zoete Wedd, the leading UK securities firm, which, they say, has been aggressively lobbying government ministries and the Office of Fair Trading, Britain's trade watchdog, to put pressure on the Japanese by blocking their entry into the gilt-edged market.

BZW, and another UK firm, James Capel, have been denied membership of the Tokyo Stock Exchange, on grounds of lack of space. However, BZW denied last night that it had lobbied the Government to ban the Japanese firms from the gilt-edged market.

The final suspect is the Trade and Industry Department which has also been actively lobbying the Japanese for greater access to their markets. Under the Financial Services Act it has the power to restrict the activities of any foreign firm from a restrictive

A second wind for sterling

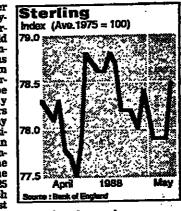

Every foreign exchange trader must be aware of the folly of buy-ing or selling on the basis of purchasing power parity, so it would be odd if yesterday's three pfennigs jump in the pound was entirely due to a report from Goldman Sachs claiming the correct rate for sterling to be DM3.27. Perhaps the study caught a couple of big traders with their books the wrong way round, and correcting the position caused a speculative dash in the market. On this view, nothing changed yesterday the pound merely moved from the bottom to the top of the DM3.125 to DM3.16 trading range in which it has been stuck for the past fortnight.

However, the sheer number and variety of explanations for the stronger pound offered yesterday suggests the market is talking itself into another tug of war with the Government over sales may make a cut in interest rates less likely; the Bundesbank may not be planning an immi-nent rise in interest rates after all. Yet the fact is that traders are simply inclined to play ster-ling again; and the prospect of ising international interest rates which recently had taken

Nomura was preparing to start upward pressure off the pound ts operations as a market-maker last Tuesday, immediately after the Bank Holiday. Its financial has been forgotten as last week's story. Light intervention by the Bank of England was enough to controls and systems received the contain yesterday's rise, but the market again looks ready to go on pushing sterling up until Bank of England's approval in early February and it has already recruited a team of 20 dealers, something gives. salesmen and administrative

Primary dealers It was not so long ago that

control of entry to government bond markets on either side of the Atlantic rested with the central banks, who based their decisions on such mundane criteria as capital adequacy and trading records. However, the whole subject is now degenerating into a game of political football between Western politicians and the Japa-nese. The Americans have nese firms to become primary dealers, but if the current US to when Nomura or Daiwa would be authorised, if at all. to when Nomura or Dalwa would will have to hand back their who was responsible for the policy U-turn? to the Tokyo stock exchange. While Japan has been slow in opening its capital markets to Western players, it is hard not to feel a certain amount of sympa-thy with the Japanese institu-

exchange rate policy. It may be tions since the politicians seem true that election results in West intent on moving the goal posts. Germany and France have increased the political charms of pulling, yesterday's rise in retail 24.9 per cent stake in Kleinwort sales may make a cut in interest. Benson's US primary dealer may be a pointer of the way ahead, since it does not appear to annoy Dow/Montedison

Dow Chemical's assault on

ontedison is a neat illustration of Italian complexity working against itself. The main trick in this kind of thing is to keep the opposition guessing and merely by inserting itself in the whole tangle of Montedison/Enichem/Ferruzzi/META, Dow has

coming Montedison/Enichem ruzzi/META deal goes through — as doubtless it will — Dow's resulting stake in Ferruzzi could resulting stake in Ferruzzi could be used to influence Mr Gardini's plans for Montedison more lit is one thing for the owners of directly. Dow could aim to take a less than 3 per cent of Stead & stake in what is left of Montedi-Simpson's equity to be offered

Dow's real problem, though, is political. There is already much heat over the idea that Montedison might sell off its dodgy hits to Enichem – that is, to the Italian taxpayer – and keep the good bits for itself. For a US company to start picking over these good bits would be more contentious again. Perhaps Dow's strangest card would be to point out that after the joint wanture goes through, Montedison could be left with sales of as little as 12km – unsustainably small for a world player in the chemical industry. Dow could, perhaps, offer itself in Dow could, perhaps, offer itself in the role of big brother; but it will be under the closest scrutiny to ensure that it does not get paid too much for the job.

MERIN

Gene'r:

However impressive President

Mitterrand's majorify in Sanday's election, the markets clearly think it inconceivable that he will go back to Socialist basics, either in his choice of rrune aumsuer or in his policies, indeed, investors are wasting very little thought on political speculation at all. Considerable uncertainties remain – over the exact political persuasion of the new Prime Minister, and the like-libood of parliamentary electrical Prime Minister or in his policies. lihood of parliamentary elections

– but their resolution seems to

be of more human than financial interest. The equity market could still be in for the small correction long predicted after the election, but it looks likely to be very small indeed.
All the indicators point,

instead, to a continued rise against the background of strong created more options than it fundamentals, a prolonged pause in the privatisation programme. Through its direct stake in Montedison, Dow may hope to influence the shape of the forth-strong. Corporate activity, loo, will continue apace. However, joint venture; or it might use its when the likes of Suez feels it has existing links with Enichem to to go for nearly FFr 10bn in capa-the same effect. Sugarman boosts bid for Media General

MR BURT SUGARMAN, a Holly-wood-based industrialist and television producer, has increased from \$61.50 to \$70 a share his offer for Media General, valuing the newspaper and broadcasting group based in Richmond Virginia at about \$2bn.

Once again, however, the Bryan family which controls the company through a two-tier stock structure said it was opposed to any sale.
Trading in Media General's class A shares was halted at

\$46%, pending news of the revised offer. Its ownership arrangement was upheld late last month by Judge Richard Williams in a Richmond

He said any merger would require separate approval by class B shareholders. The Bryan family and its trusts own more than 70 per cent of B shares. a simple majority of all 27.7m A and 560,000 B shares combined would be sufficient.

He intends to press on, however, with his proxy fight for three of the nine seats on Media General's board at its May 20 shareholders meeting.

Paul Betts on a French oil group's private sector ambitions

Elf seeks to break state chains

France's large state-controlled industrial groups have long been agitated by thoughts about what happens to the French privatisa-tion programme after the presi-dential election. Now that Presi-

dent François Mitterrand has been re-elected with a comfortable majority, the issue is more uncertain than ever.

After the flurry of privatisations launched by the right-wing Chirac Government in 1986 and interrupted by last October's stock market crash, the socialists indicated that in the event of a Mitterrand victory, they would not contemplate a new wave of nationalisation. But at the same time they suggested they would not be in any great hurry to pri-vatise existing groups in state

ownership.
This approach, if confirmed by Michel Pecqueur: needs access the future French administration, to financial markets

Michel Pecqueur, Kir's chairman, profits of FFr4.1on (\$719.2m) on said last week a few days before sales of FFr127.4bm last year, is the second round of the presidential election that although privatisation was not an urgent issue for the oil group it was none the less crucial for the longer term to subscribe to its share of any development of Elf. Mr Gilbert eventual funding. The general feeling inside most state com-

the future French administration, risks seriously frustrating the ambitions of groups like Rhône-Poulenc, the nationalised chemicals concern, and Pechiney, the state-owned aluminium and metal manufacturer, which have argued for months for privatisation. However, Elf is in many respects a case apart in the French privatisation programme. Unlike Rhône-Poulenc, Pechiney thon. Both companies wish to tap international financial markets to finance development and fund hig acquisitions.

Elf Aquitaine, the state-controlled diversified oil group, has also been making an increasingly vocal case for privatisation. Mr Michel Pecqueur, Elf's chairman, said last week a few days before seriously frustration in the financial markets markets through a process of privatisation. However, Elf is in many respects a case apart in the French privatisation programme. Unlike Rhône-Poulenc, Pechiney or for that matter, the Renault car group, Elf has always had a large minority of its capital in the private sector. Following the sale of part of the Government's stake in Elf in 1985, the state interest in Elf, one of France's largest industrial concerns with michel Pecqueur, Elf's chairman, profits of FFr4.1bn (\$719.2m) on said last week a few days before

Mr Pecqueur acknowledges that for strategic and political reasons any government would oil and gas business; chemicals; clearly be reluctant to privatise and pharmaceuticals. This divercompletely a group such as Elf.

But he argues that it could still counter the decline in its tradimatain control while allowing the strong recovery in its chemiits own direct stake to fall below 50 per cent. Mr Pecqueur cites the example of CFP, the Total oil group in which the state holds

holding of just 35 per cent.

Mr Pecqueur believes a greater degree of private ownership in Elf would enable his group to develop "like any normal com-pany" by giving it the necessary flexibility to turn to financial markets to help finance its inter-national development when

in south-western France.

Lacq is no longer a cash cow, although Mr Pecqueur says its decline is under control with output stabilised at 3.5bn cubic metres of gas a year until 1992. However, this is still only half of of what Lacq was producing a few years ago.

on is still on the lookout for development opportunities on the US market. Mr Pecqueur says the chemical operations are also on the lookout for opportunities to comfort their competitive position.

The question now for most French state-sector industrial groups is how outckly the new

The feeling is that the new administions - the group recently tration is expected to adopt a acquired for \$308mn RTZ's oil pragmatic approach to privatisa-and gas interests and its Sanofi tion to enable state groups and gas interests and its Sanofi tion to enable state groups pharmaceutical subsidiary greater opportunities and flexibil launched an unsuccessful bid a ity to tap markets — in the

Hoesch earnings hit by provisions

By David Goodbart in Hope HORSCH, one of West Germany's big four steel producers, has somounced an increase in 1987 pre-tax profit and reported a strong first quarter for the current year.

The pre-tax figure rose from DM145m to DM191m (31143m), sithough after pro-visions earningt showed a steep decline. Turnover fell slightly to DM7.37km to DM7.35tm.

Roya

944,1

After provisions, profits fall sharply from DM271m to DM271m to DM28m, but Hosseh claims the highest level of provisions, at 39 per cent of its balance sheet, of any comparable Garage Comparable Carage Carag

man company.

An extraordinary provision of DM102m will cover future costs arising from various tax claims, retirement payments and social plan costs, relating to feture plant closures. Bebt has also been reduced by DM150m and is below 25 per cent of the balance sheet.

cent of the natance steet.

The company was especially pleased to announce a healthy pleased to announce a healthy pleased to announce a healthy pleased to mission which still accounts for about 39 per cent of turnover — although the aim is to reduce the steet of t

over — although the aim is to reduce it to 25 per cent.

The industrial (34 per cent of turnover) and the trade (24 per cent) divisions produced about DM88m between them, and over DM50m came from related companies.

Mr Detley Rohwedder, Hoesch's chairman, said that the German steel industry was much healthier tham events such as the closure of Rheimhausen made it seem.

hausen made it seem.

He also said that the com-pany was still seeking to expand its newest and smallest division, automation and systems, mainly by acquisi-

Net sales in the first quarter of this year were up 16 per cent and the order book at the end of March was 20 per cent up on last year. Cash-flow was up to DM401m from DM313m. The dividend remains the same at DM5 a shure.

Dutch software group to expand

By Laura Raun in Amsterdam

VOLMAC SOFTWARE, the Dutch computer software house that is going public, and Cap Gendini Sogeti, the big French software company, are taking 5 per cent stakes in each other in a drive to expand

abroad.
Volmac is being floated in a
Fl 280m (\$63.8m) deal that is the biggest initial offering in the Amsterdam bourse's recent history and certainly since last year's equity crash. Subscrip-tions for the 69.7 per cent of Volume shares being offered

Volume shares being offered publicly close tomorrow and trading begins on Monday.

Cap Gemini Sogeti is the higgest software house in Europe and has a minority stake in the recently merged Semacap group, which joined Cap Group of the UK and Sema Metra of France.

Can Group split off from Cap

Cap Group split off from Cap Gemini Sogeti some years ago. The complex cross holdings will widen the horizons for all three groups in the triangle, giving Volmac an indirect stake in Semacap.

Generali to raise L1,100bn

BY JOHN WYLES IN ROME

ASSICURAZIONI Generali, Italy's largest insurance company, plans to raise L1,100bn (\$88m) through a capital increase designed to help finance a development strategy which includes a growing shareholding in Compagnie du Midi, the diversified French insurance and industrial group.
In a calculated reminder of its strength, the Trieste insurer yes-

terday also announced a 16.6 per cent increase in net profits to L254.2bn for 1987, and a 20 per cent increase in dividends for its 75,000 shareholders, taking into account a free share issue last

L420bn to L840bn. The issue of 110m new shares at L10,000, carrying a premium of L8,000, will raise total capital to L1,060bn. This will be Generali's first paid-up capital increase for Yesterday's announcements month.

stake in Midi had risen from 13.6
per cent to 14.5 per cent.

Having spent about L900bn
building up this position and
with plans to raise L1,100bn from
its shareholders, the Italian
insurer is still coy about its
L2,545bn from Italy and L1,383bn

intentions.

An official said yesterday that

was aiming for a blocking third which could halt the defensive merger announced last month between Midi and France's Aza insurance confederation. This is due to be voted at a Midi shareholders meeting next

Yesterday's announced also from the Generali board also revealed that the company's its, Generali's net capital has risen by 16 per cent to L1,606m.

The next capital increase, to be put to a shareholders' meeting in June, will also include a scrip issue on a one-for-one basis which will raise capital from timentions.

An official said yesterday that the aim was to have a "leading time had increased by 41.3 per voice" in Midi's affairs.

However, he would neither insurance climbed by 16 per cent to 12,820bn. from overseas activiti

United

united engineers Malaysia (UEM), a controversial con-(UEM), a controversial construction group, is to gain a relisting on the Kuala Lumpur Stock Exchange later this month, following its emergence as a leading public vehicle of the ruling United Malays National Organisation of Dr Mahathir Mohamad, the Prime Minister. Prime Minister.

URM, shares in which have been suspended for the past five years amid heavy losses, said in a circular to shareholders yesterday that the KISE has approved the relisting of its 75m shares following a restructuring scheme for the company in 1986.

Shares of UEM stood at 1.27 shares of UEM stood at 1.27 ringgit when they were suspended in May 1983. They are currently changing hands in off-market private sales at about 4.5 ringgit, valuing the group at some 337.5m ringgit

(US\$130.5m). UEM returned to a small pre-tax profit in 1987 of 8.5m ringgit but this still left accamulated losses of 78.3m ringgit by the year-end. It expects pre-tax earnings of 32.6m ring-

git for the current year. Since control of the comp was acquired by the UMNO party in 1986, UEM has man-aged to secure a number of important government con-struction and engineering con-tracts, including the 4.5bn ringgit north-south highway

project.
UEM is to build the 800km (500 mile) highway over seven years, starting in August, in return for the right to collect

return for the right to consist tolls for 30 years.

The highway award was the subject of considerable politi-cal controversy. The opposi-tion Democratic Action Party challenged the award to UEM right up to the supreme court, which ruled last January that the Government had the right to give the contract to UEM.

Reil sells Lilypak to Finnish group

BY CHRIS SHERWELL IN SYDNEY AND OLLI VIRTANEN IN HELSINKI

REIL CORPORATION, an Austra- largest supplier of disposable lian investment group, yesterday sold its Lilypak disposable tableware company in a continued retreat from an abortive attempt to acquire control of Wormald, the fire protection and security

Lilypak is being purchased by Huhtamäki, a Finnish food, pharmaceutical and packaging com-pany, for A\$104m (US\$80.1m). It is thought to have cost Reil about
A\$45m less than two years ago.
The sale follows Reil's decision
in March to drop an arrangement with Wormald under which it would have increased its stake in the group from 17 per cent to 31 per cent over five years.
Having gone into Wormald just prior to last October's stock mar-

tet crash, this failure to acquire control was costly. Under finan-cial pressure, Rell began enter-taining offers for Lilypak.

According to yesterday's pre-liminary agreement, which is subject to government approval, Huhtamäki's purchase price com-prises A\$82m for the share capi-

al of Lilypak and A\$22m of Lilypak produces disposable cups and plates primarily for fast od chains and packagings for the dairy industry. It has two plants in Sydney and one in

Auckland, New Zealand and had turnover in 1987 of A\$100m. On completion of the deal, Lilyoak will become the centre of operations for Huhtamäki's Polarcup group in the Asia-Pa-cific region. Polarcup already has plants in Singapore and Saudi Arabia as well as Europe. Huhtamäki said the deal would

nake Polarcup the world's third

acquisition. The group's largest business sector is confectionery which includes Lett, the sweets manufacturer with 11 production plants in North America.

For Reil, the transaction leaves it with one main operating arm, known as Sunbeam Victa, an electrical appliance and lawnmower group. It is also thought to be seeking to dispose of its

could be precipitated by any further decline in the dollar.
One Paris-based analyst noted, however, that rumours of a realignment had been circulating for several months and were now largely discounted. In any case, while the franc band is likely to be lowered in an alignment, the range is not expected to move down radically.

Once the risk of franc devaluation through a realignment diminishes, French bond yields look set to drop. Despite pre-elec-tion worries, yields managed to

The bullish mood on govern-ment bond markets augurs well for the future development of the Eurofranc bond market. Although the market was successfully reopened in 1985 after the Socialist Government closed it in 1981, it suffers from a chronic lack of liquidity and the vestiges of dirigisme or excessive state regulation.

In the run-up to the single European market in 1992, this is being slowly improved. The Trea-sury has just reduced the minimum maturity on Eurofranc issues to three years, in a bid to boost liquidity, and has also indicated it would be willing to consider applications from Frenchbased subsidiaries of foreign banks to lead manage new issues. banks to lead manage new issues. Paris is also well placed to benefit from the anticipated large upturn in cross-border business, particularly in swaps and finan-cial arbitrage, which can only further boost the Eurofranc sec-

French bond markets slipped marginally yesterday, largely in response to last week's falls on the US Treasury market. Both foreigners and domestic institutions stuck to the sidelines ahead of Mr Mitterrand's nomination of

Nikko Europe appoints woman to board

By Stephen Fidler, Euromarkets Correspondent

THE JAPANESE securities house, Nikko Securities, has appointed a woman as a mem-ber of the board of its European subsidiary, an unprecedented appointment at a

The appointment of Miss Haruko Fukuda, 41, formerly a senior executive director in charge of the Japanese depart-ment at the UK stockbroker, James Capel, is aimed at broadening the firm's equity business in Europe. Although a Japanese national, she has lived in London for 26 years

Haruko Fukuda

and is the first of Nikko Europe's board members to be hired in the UK. The appointment of a woman at such a senior level

is unusual at a Japanese firm either inside or outside Japan. Mr Yuki Shirakawa, chairman of Nikko Europe, said that Miss Fukuda's broad experi-ence in the London market, and her ability to bridge two cultures, was behind her

Miss Fukuda joined Capel in 1974, to which she moved as part of a team from Vickers da Costa. She took over the Japanese department in 1976 and became a partner in 1980, before Capel was acquired by the Hongkong and Shanghai Banking Corporation. Her departure from the firm was

US decline prompts fall in West German prices

marked narrowly easier but drifted in thin volume, supported at marginally lower levels by an absence of selling pressure. The tone was decidedly bearish in the wake of last Friday's sell-off on the Treasury market. This was triggered by a US jobs report showing unemployment at a 14-year low of 5.4 per cent.

Dealers said the attractions of anticipated higher yields would

anticipated higher yields would be offset by deeper fears about global inflation and an imminent tightening of US Federal Reserve monetary policy.

Dealers in Germany marked prices down sharply when their market reopened yesterday morning. Euromark bond prices dropped by as much as a full point while government bonds saw falls of between 15 and 50 plennigs. Both sectors have been extremely nervous lately. Foreign investors, robbed of speculative currency profits by stabler for-eign exchange markets, have shunned the market. The US data was the final spur to an early round of panic selling. The mood is likely to remain bearish all week in anticipation of any move by the Fed to raise

narrow trading range recently put option.
while a lack of sitractive swap in Switzerland, the bearish opportunities has inhibited new mood in West Germany subdued issue activity in Kurosterling.

Dealers were divided as to whether the representation of the control of the c

WEST GERMAN bond prices fell sharply yesterday as traders took fright following last Friday's decline in US Treasury bond prices. The yield on 10-year government bonds rose to 6.54 per cent, its highest level so far this year. The 10-year yield was below 6.5 per cent early last week but 6.54 per cent before finding any substantial support.

Nervous, thin trading characterised most other sectors of the Eurobond market, with both last week's US bond market falls and this week's US branched market falls and this week's US Treasury quarterly refunding anctions inhibiting primary and secondary market activity.

Burodollar bond prices were marked narrowly easier but drifted in thin volume, supported at marginally longer levels by the same levels of the same levels of the calculation of the gilt market where yielde have now dropped below 9 per cent. The longer end of the market set in this commany and the market and the first trade in the commany and secondary market activity.

Surodollar bond prices were marked narrowly easier but drifted in thin volume, supported the single of the pilit market where yielde have now dropped below 9 per cent. The longer to five market where yielde have now dropped below 9 per cent. The longer to five market said to five market and to five market and to five the firmer tone of starling. In a darlinet steepening of the yield curve.

MANUFACTURERS HANOVER

Results

Projections, 1987 Annual Report:

"...stronger operating earnings, restoring shareholders' equity."

Update, Annual Meeting, April 1988:

"For the first quarter...\$140.3 million net income. \$700 million in new equity."

Excerpts from remarks by Chairman John F. McGillicuddy at the MHC annual meeting on April 22, 1988.

"We looked for stronger operating earnings in 1988 based on three fundamentalsfurther success in managing our businesses for higher returns, lower operating expenses and a continued improvement in credit quality.

"For the first quarter, net income totalled \$140.3 million—an increase of 73.2 percent over last year's first quarter and representing our highest ever quarterly net income.

"And these record results are characterized by a very strong operating earnings component.

"Also during the first quarter, we continued to demonstrate success in cost control, an area that will continue to be a priority item for us.

"In summary, then, Manufacturers Hanover's operating results in the first quarter were ahead of what we had been projecting.

"And our overall results—including tax benefits and other special gains—are also ahead of schedule in terms of the total financial plan we had laid out. The sale of our consumer finance subsidiary is a major part of that plan.

"This will result in a pre-tax gain of \$300 million-and, after recognition of tax benefits, will add approximately \$275 million to common shareholders' equity.

"Thus, on a pro forma basis, if you include the effect of this transaction. our common equity on March 31st would equate to \$2.43 billion, or 3.45 percent of assets. This is up \$700 million from June 30th of last year, when our ratio was 2.36 percent.

"We already had a higher equity-toasset ratio at the Trust Company. On an actual basis at March 31st, it stood at 3.34 percent of assets, and we will continue to build on this base.

'Following the sale of our consumer finance subsidiary, we will make another capital infusion in the Trust Company, bringing its ratio of common shareholders' equity to assets to approximately 4.0 percent. By year's end, our plan is to achieve a ratio of 4.5 percent.

"The capital restoration plan we presented in our annual report and its most fundamental component, strong earnings from our core businesses, are running ahead

"Thanks to the extraordinary effort of the men and women of Manufacturers Hanover, 1988 looks even more promising than the picture we portrayed to you in our annual report."

Holders prefer units in TR Tech liquidation

Investment Trust, 2302.5m in assets, have fishily been divided after a seven-month dispute between the Touche Remnant managed investment trust and a 27 per cent since-holder, Jersey-based Firman-dale Investments. Independent investors upted

heavily to switch into a TR mit trust rather than two heav quoted investment vehicles. However, because the proportional distribution had been fixed since March, elections for the proportional distribution had been fixed since March, elections for the property had been fixed the property of the proper units will be heavily scaled

units will be heavily stated down.

Under the liquidation formula agreed by TE and Firmandale, 27 per cent of assets will be distributed to Govett American Endeavour Fund, an offshore dollar-denominated fund managed by Berkeley Govett, Firmandale's adviser.

The rest remains under TE management, split between an existing unit trust, Global Technology Fund (28 per cent), and TE Technology, a new split-level investment trust (45 per cent).

Firmandale was joined by few independent investors in selecting Endeavour, so shareholders will receive 97 per cent of the shares applied for.

Within the TE stable, however, more than two-thirds of

ever, more than two-thirds of shares were committed to the unit trust option, far more than available. As a result, shareholders will receive only 56 per cent of the units applied for. Applications for the new TR Technology trust be met in

Biwater £4.8m offer fully unconditional

by Andrew Hill Biwater, a private water con-tracting and engineering group, has declared its \$4.75m agreed offer for East Worces-tershire Waterworks fully

unconditional and final.

The offer — the first for a statutory water company since the 1973 Water Act - was made by Biwater Supply, a joint venture between the pri-vate company and senior man-agers of East Worcestershire.

Biwater now owns or has received acceptances for ordinary stock and £10 ordinary stock equivalent to 61.8 per cent of East Worcestershire's voting shares.

The company was forced to increase its offer two weeks ago when it bought a 12.5 per cent stake from Lyonnaise des Eaux, a French water supplier which acquired the shares in breach of the Takeover Code, The Panel forced Lyonnaise to sell the holding.

The offer will remain open until further notice.

IN BRIEF

FLEMING FAR Eastern Invest-ment reports earnings 0.96p for year ended March 31 1988 (0.82p) and paying final dividend 0.7p for 0.9p (0.8p) total. Net asset value 214p per share. Income £5.47m (£4.57m) and pre-tax revenue \$2,44m (£2.07m).

GT ASIA (Sterling) Fund: loss 59,735 year ended March 31 1988 (profit 596,621). Income £143,860 (£228,680). Value of units held in GT Asia Fund £19.57m (£20.06m).

LEXICON (Massachusetts-based maker of digital audio equip-ment): Pre-tax losses \$589,000 (£316,000) for six months to February 29 1988 against \$956,000. Net sales \$4.13m (\$2.98m). Losses per share 4 cents (same) after tax credit \$270,000 (\$634,000).

Japanese build cadmium stockpile

BY KENNETH GOODING IN

THE JAPANESE are building a protect themselves against possible shortages or further substantial price rises for a metal which already has gone up from \$1 a lb this time last year to more than

According to delegates at the Metal Bulletin Minor Metals Sem-inar here, the Japanese this year will buy more than 1,000 tonnes of cadmium for their stockpile compared with their total con-sumption last year of 2,260

About 80 per cent of the cadmium is being used in rechargea-ble nickel-cadmium batteries and the biggest producer of the portable variety, Sanyo, will this year consume 2,000 tonnes, more than the whole of the Japanese battery industry in 1987, predicted Mr Marc Desirat of the Vielle Montagne Metals group.
Traders also said that there

were signs that the Soviet Union was building up its reserves of cadmium in preparation for pro-duction of its own nickel-cad-mium industrial batteries using technology acquired recently from Saft of France, overall the major producer of nickel-cadmium batteries. Soviet inquiries for 50 and 100 tonne lots of cad-mium are currently being dealt

with by West European traders.
Mr Phillippe Seurin, Saft's
industrial director, pointed out
that nickel-cadmium batteries were probably best able to with-stand the extreme temperatures the Soviet railway system so the

However, he said that the current high price of cadmium would in the medium term speed up recycling of batteries and the introduction of replacement tech

Saft estimated that it would be possible to reclaim 100 per cent of the cadmium used in industrial batteries but only 20 per cent of that in portable batteries, which are typically used in consumer goods and tools. That would still provide an annual 2,000 tonnes of cadmium compared with an output of primary metal of around

Producers and users at the seminar were predictably far apart on their estimates of cadmium consumption by the \$1bn battery business this year.

Renewed surge by sterling

STERLING rose to its highest level against the D-Mark for nearly two years. The pound ment this week, because the US weeks. The D-Mark was fixed at moven each under the spottight, as the dollar was left to one side.

Buying of the pound was seen in Singapore and Tokyo, leaving the currency at around DM3.14. before a large commercial order in early London trading pushed it

in early location training pushed it up to DM3.15.
Starting remained in demand, closing at the highest level since July 1986, as it ruse to DM3.1825 from DM3.18275 on Friday.

Starting remained in demand, closing at the highest level since.

Str1.4005 from Str1.4015; and to the day the Bundesbank did not intervene when the dollar was firm DM3.1275 on Friday.

There was a little intervention by the Bank of England, but only as a smoothing operation. The UK authorities appeared content to let the pound rise on the froth created by a forecast from US commission house, Goldman there was a little intervention by the Bank of England, but only as a smoothing operation. The UK authorities appeared content to let the pound rise on the froth created by a forecast from US commission house, Goldman Sachs, reported in the UK press at the weekend.

According to Goldman Sachs the pound may have the potential to rise to DM3.27, but dealers were quick to note that another

FF710.6350. On Bank of England figures the pound's exchange rate index rose 0.6 to 78.5, the highest since

UK rates lower

INTEREST RATES fell in London yesterday, as sterling moved higher on favourable weekend press comment. The pound's improvement came after a report from Goldman Sachs, which suggested that there was no need for an increase in EK interest rates and that the pound could sustain a further rise against the D.Mark.

Three month interbank money fell to 94.84 p.c. from 8%.8% while the one year rate was lower at 9%.8% p.c. from 9%.9% p.c. and moved up to 8%.8% p.c. and moved up to 8%.8% p.c. Late help came to £110m, before slipping away to a low of 2 p.c. However late balances were taken nearer 5 p.c.

If chartest a first the standard in the first purchases of £200m of eligible bank bills, all in band 1 at 7% p.c. in band 2 it bought 433m of eligible bank bills and 200m of eligible bank bills, all in band 1 at 7% p.c. Late help came to £110m, before slipping away to a low of 2 p.c. However late balances were taken nearer 5 p.c.

If chartest the form of the morning of £49m, through outright purchases of £10m in band 4 all at 7% p.c. Additional assistance in the morning of £49m, through outright purchases of £10m in band 2 and £18m in band 4 all at 7% p.c. Additional assistance in the morning of £49m, through outright purchases of £10m in band 2 and £18m in band 4 all at 7% p.c. Additional assistance in the afternoon came to £110m of Treasury bills, £9m of local authority bills and £200m of eligible bank bills, all in band 1 at 7% p.c. In band 2 it bought £13m of eligible bank bills and £200m of eligible bank bills, all in band 1 at 7% p.c. In band 2 it bought £13m of eligible bank bills and £200m of

The Bank of England forecast a shortage of around \$450m, with factors affecting the market including repayment of late assistance and hills maturing in official hands, together with a take up of Treasury bills draining \$557m. The unwinding of previous sale and repurchase agreements absorbed a further £302m while banks brought forward halances £240m below target. These were partly offset by Exchaquer transactions which added £213m and a fall in the nofe circulation of £650m.

FINANCIAL FUTURES

Mixed reaction to strong pound

SHORT STERLING prices rose and a fall in cash rates, quickly sharply in yesterday's Liffe marboosted values to a high of 91.42, ket after a strong rise in steralling's value. The pound's improvement was seen as reducing the possibility of a rise in UK base rates. However gilt prices unwinding oversold positions.

Long gilt futures were left langing after many market makers investors remained concerned about a rise in the rate of inflation.

The June price for three-month 15,000 as investors aired their while 2 0.6 p.c. rise in output

Little change is expected until the US trade figures are published on May 17.

In quiet trading the dollar rose to DM1.6820 from DM1.68, but eased to Y124.80 from Y124.85; to SRT1.4006 from SRT1.4015; and to the double production of the dollar was very quiet, finishing at \$1.6805, compared with DM1.6820 on Friday. Earlier in the dollar was productioned at the production of the dollar was productioned. The June price for three-month 15,000 as investors aired their sterling deposits opened at 91.29, misgivings about the risks of up from 91.20 on Friday. The higher inflation. pound's sudden improvement

Apart from sterling, which was particularly strong, the other currency to find some measure of interest in Frankfurt was the French franc. to rise to DM3.27, but dealers were quick to note that another forecast at the weekend pointed to starling falling to DM2.60.

Barclays de Zoste Wedd said it disagrees with both extremes, and suspects the pound will still be around DM2.00 in 1992.

Sterling also rose 1.80 cents to \$1,5795, and climbed to Y234.50 from Y232.50; to SF72.6325 from F7740.6350.

Interest in Frankfurt was the the weekend switched attention to sterling. The pound was particularly strong against the D.Mark, which appeared to defy speculation gainst the D.Mark, which appeared to defy speculation to sterling. The pound was particularly strong against the D.Mark, which appeared to defy speculation for the appeared to be ripe to trade on devaluation of the currency in the EMS.

At the fixing in Paris the towards the close.

Anglo American Coal Corporation Limited

(Incorporated in the Republic of South Africa)

"Amcoal maintains dividend and is forecasting improved results"

Extracts from the review by the Chairman, Mr W G Boustred

As forecast in the 1987 annual report, the earnings attributable to Amcoel shareholders of R104.9 million were substantially lower than the R190.9

million earned in the previous year.

Export tonnages decreased by 11 per cent, US dollar prices were weaker and a stronger average rand/US dollar exchange rate resulted in significantly lower export revenues. Revenue was further eroded by successive increases in the export railage rates introduced in April and September 1987. These adverse factors were partially offset by increased coal sales to Eskom and the containment of unitworking cost increases to a level below the rate of inflation. The Group's cash resources remain a substantial asset and income from these funds made an important

contribution to group earnings.

After deducting minority shareholders' interests of R6.7 million, the attributable earnings of R104.9 million represented earnings of 423.4 cents per share compared with 781.1 cents for the previous year. A final dividend of 160 cents per share has been declared, maintaining the total dividend for the year at 240 cents per share. The dividend cover of 1.8 times is considered adequate in current circumstances.

During calendar 1987, exports of South African coal totalled 42.6 million tons, some 2.9 million tons or 6 per cent less than the tonnage exported in

Amcoal's own export tonnages during the financial year under review declined by 0.2 million tons, or 3 per cent less than in the previous year, There was, in addition, a further significant reduction of 0.9 million tons or 23 per cent in the Group's exports on behalf of the TCOA as the sanctions applied by France, Denmark and the United States took their effect.

The oversupply of steam coal in world markets continued well into the financial year with spot prices for South African steam coal falling to below US\$20 per ton. This, together with the other adverse factors mentioned above, severely impacted the operations of South African exporters and resulted in significant quantities of coal being exported at a

However, in recent months prices have improved, and contract and spot coal prices are now in the range of US\$25-US\$27 per ton FOB Richards Bay. These improved prices have flowed from China's inability to meet its confractual arrangements both in Europe and the Far East, thus creating a tightness in the supply from other producers. While current price levels can probably sustain established operations, prices will need to increase further to justify any new investment in export

Industrial relations

The strike by members of NUM over the issue of wages, following a number of work stoppages earlier in the year, was a set-back in the process of building a sound and constructive relationship with trade unions and employees. White Amcoal remains committed to a policy of constructive relations with trade unions, such unions must accept that the best interests of their members cannot be served by policies and

actions which threaten the long-term viability of the industry.

The willingness of NUM to reach a negotiated settlement in respect of employees dismissed during the strike last year was a positive development, especially as the settlement provides for a code of conduct which will enable both Amcoal and NUM to act against workplace

It is important to note that the strike involved only one group of unionised employees and that members of other unions and officials' associations made it possible to maintain production at high levels during the strike, and this must be acknowledged.

The lack of progress in abolishing the statutory job reservation provisions of the Mines and Works Act continues to be of concern. In hampering the advancement of employees of colour in the mining discipline we are losing time and goodwill. This the country can ill afford, and the Minister of Economic Affairs and Technology needs to proceed

on the issue with all due haste.

The Group accepted the invitation of the board of Anglo American Corporation of South Africa Limited to participate in The Anglo American Group Employee Shareholder Scheme. This scheme, which is entirely voluntary, will enable employees with two or more years' service to become shareholders of Anglo American Corporation. The scheme will allow employees to experience wealth as a resource and will show how money invested in well managed enterprises creates wealth for the community in addition to providing a worthwhile reward to the investor. Over 80 per cent of Amcoal's employees have elected to join the scheme, a strong endorsement by employees of its objectives and a measure of the effectiveness with which these were communicated to employees.

Future prospects

Based on recent trends in the international coal merkets, the lower rand/US dollar exchange rate, and subject to no further sanctions, Amonal's earnings from coal exports are expected to show some improvement, and there will be further growth in domestic earnings. Accordingly, the Group is forecasting improved results for the year

In the longer term, it is difficult to forecast the environment in which the Group will operate. South Africa cannot afford an inflation rate substantially above the rates of its major trading partners, and consequently the recent initiatives taken by the State President in the fight against inflation are to be welcomed. Restraints on prices and earnings, however, must be accompanied by sound fiscal and monetary policies if major distortions are to be avoided. New economic policies, however soundly based and courageously implemented, will not secure a stable future for the country without concomitant moves towards political reform and power sharing and it is imperative that the stalled reform initiatives regain momentum. The recent constitutional proposals announced by the State President are a move towards this objective. Given real political and economic progress, I am confident that Among position in the coal markets, will earn acceptable returns for its

STERLING'S LATEST upswing stopped blue chip equities consolidating small early gains as the new trading Account got underway yesterday but UK Security markets were accorded credit for again attempting to resist the continuing downbeat performances of both the US and Japanese markets.
Attention switched back to

sterling and London foreign exchange markets after heavy Far Eastern support overnight. Overseas investors see the pound as a high-yielding currency, and Japanese funds were particularly aggressive. The UK institutions were slow to respond but bought sterling later, leaving the rate charmly higher against both the sharply higher against both the dollar and D-Mark.

A weekend report of a chal-lenge to the consensus view that the UK currency would fall later this year also gave the market a boost. Mr. David Morrison, economist at US investment house Goldman Sachs, disagrees with the opinions of his fellows, ecboed recently by the Chancellor of the Exchequer, that the recent gains in sterling were unsustain-

DRI Europe, the economic consultancy group, on the other hand is another advocate of future sterling weakness. This weekend it predicted a marked reaction in the rate from the current level of DM3.15 to DM2.60 by

the year end. The big exporting stocks, which had improved against the odds intitially, gave back the improvements as the exchange rate prospered. ICI, one of the few majors thought invulnerable to recent takeover speculation, ere put in the frame by a market commentator and rose to £10 bid before easing back. Marketmakets reacted tongue-in-cheek

to the suggestion! Political calls for a Monopolies & Mergers Commission investigation into Rowntree - the Office of Fair Trading is examining the situation - led to slower traffic in the shares. After turnover of 7.8m, the shares again closed lit-Schweppes slipped back on thoughts of a possible OFT inquiry into the General Cinema

Stability to equities was injected by announcement of the Producer Prices indices for April. These measure industry's fuel and raw material costs and were in line with City expectations. According to Mr Ian Harwood, economist with Warburg Securi-ties, the figures "show that infla-

Attempt to remain above FT-SE 1800 fails as leading

It was afternoon before the FT-SE index moved below 1800 and into the red for the first time. This followed yet another drab opening, which had been well signposted, on Wall Street. Leading issues retreated in thin trad-ing and the index closed a net 6.2 down on the day at 1794.9. The bulk of the shares traded figure

of 368m was effected before the

afternoon fall. With the Japanese and US investors showing caution ahead of this week's three-day Treasury bill auction and European bond markets moving down yesterday. Gilt-edged traders were reluctant to heed the exchange rate's strength. Early activity developed among the shorts but response at the longer end of the

turning off in London, medium and longer-dated Gilts hovered either side of Friday's closing levels before ending a touch harder

Pearl Group attracted persistent strong buying throughout the session and ended the day a net 4 higher at 477p on turnover of 2.3m shares.

doing the rounds in Unigate which jumped 5 more to 307p.

response to news of the bid in sterling and lower opening lev-els on Wall Street. Resisting the pared with 23.5m in the previous trend, BOC closed a shade firmer long-term buy. Nomura says that ing speculation concerning Karry BOC's earnings are of exceptional premium PE rating relative to the UK Market. at 384p as Nomura Research recissue in the heavily-traded elec-tricals sector. A "switch into Brit-ish Gas" recommendation issued

the UK Market.
English China Clays, a strong 3½ lower at 247½p. Turnover in GEC totalled 2.7m shares and in Plessey 1.2m shares; the former eased a penny to 1480 and the latter 3 to 1530 with the market unhappy over the level of cost savings announced by the GEC/Plessey Telecommunications joint vennary figures and the proposed one-for-four scrip issue left Hunting Associated 30 higher at 443p. Beaverco, reflecting the proposed acquisition of Wakefield-based Racal attracted turnover of

improved 10 to 200p.

of some 3.6m shares.

Low and Bonar improved 5 more to 263p as FH Tomkins bid

speculation persisted, while take-over suggestions prompted-strength in A. Wood which jumped 15 to 167p. Bowater, a current Morgan Grenfell recom-mendation, firmed 4 to 390p. BAA

continued to attract buyers fol-lowing further comment on the

group's possible bid for Lynton

Property and Reversionary, clos-ing 5 dearer at 272p in a volume

Stanhope featured the property sector rising 19 to 276p as the company revealed that is having

talks which could lead to a major investor taking a significant

stake. Stanhope also announced

that the joint venture with Rose-haugh to redevelop the Royal Albert Docks had gained

approval in principle from the London Docklands Development

Other properties showed small

4.2m shares and eventually ended the day a shade harder at 322p, after widespread comment in the weekend Press about the possibility of takeover moves by either Cable & Wireless or Siemens.

GKN remained a relatively lively market (some 2.6m. shares hanged hands) in the wake of the continuing boom in car sales, the shares advancing afresh to

close 6 higher at 331p.
In a recent update on the group Morgan Grenfell (MG), the securities house is recommending pur-chases. MG points out that strong European car volumes ensure a steady contribution from the CJV businesses, while growth is expected from the industrial serpreliminary figures today with expected from the industrial ser-Morgan Grenfell forecasting pre vices and defence interests. They -tax profits of £240m against last also suggest that break-up possibilities have not yet been discounted

Elsewhere in the Engineering sector, Rolls-Royce were actively traded (8.8m) and rose 5 to 121p following a week-end Press report suggesting that the group is close to launching a more powerful version of its successful RB-211-

Northern Foods advanced 4 erated its recent more bullish more to 314p after speculation in stance, put on 3 to 181p, and Next the weekend Press that the stake ultimately controlled by Hazle wood Foods had been upped to and the forthcoming analysts and around 3.4 per cent; the market fund managers trip to the US was additionally boosted by talk operations boosted Ratners 5 that Grand Metropolitan could move in as a bidder for Northern.

WORLD STOCK MARKETS

Dow moves lower in heavy Speculative interest dividend-related trading

Wall Street

THE EQUITY MARKET drifted Jones Industrial Average closed below 2,000 for the first time since April 21, writes Janet Bush ments of the time about inflation.

Inflation fears were again high-lighted by a strong set of employsince April 21, writes Janet Bush ments figures released on Friday.

points lower at 1,997.35. Volume was high with more than 166m shares changing hands. However, much activity centred on shares which are due to go ex dividend
— including utilities Southwestern Public Service and Houston
Industries.

Apart from this dividend activity, there was little interest in the market yesterday as both equities and bond traders are playing a cautious game ahead of this week's US Treasury quarterly refunding, which begins today with the sale of \$8.75bn three-

Dealing was subdued in the US Treasury bond market yesterday. Prices had traded little changed from Friday's close for most of the morning session but then drifted lower.

Shorter maturities were quoted up to % point lower, while the Treasury's benchmark long bond stood unchanged in late trading to yield 9.15 per cent, above its low for the day.

The market continues to be dominated by two main worries:

expectations that the US Federal Reserve will tighten monetary policy in response to the strength of the economy, and concerns

ment figures released on Friday. Fed Funds reached their sesper cent, compared with an average rate of 6.88 per cent on Friday. The Dow index closed 10.12 sion highs in late trading at 7%

The Fed announced it was adding \$1.5bn to the money market through customer repurchase agreements yesterday, somewhat below some market expectations. The market's main preoccupation is trying to establish how much the Fed will tighten and when. On the equity market, a num-ber of stocks were involved in takeover activity.

Murray Ohio Manufacturing jumped \$18 to \$53%, after news of a \$48 a share takeover offer from Electrolux of Sweden which it rejected. The company got a temporary restraining order, barring Electrolux from buying any of its shares for 10 days. RTE Corp gained \$3% to \$44%.

Cooper Industries agreed to buy RTE for \$45 a share, which compared with a \$36 a share sweetened offer from Mark IV Indus-tries. Cooper's price fell \$1 to \$56% and Mark IV rose \$% to

rejected a \$35 a share takeover offer from Tate & Lyle, said it was in talks with third parties

about being acquired. In over the counter trading, Western Publishing slumped \$3 to \$19 in the wake of the announcement by Gulf & Western that talks about its possible acquisition of Western Publishing had been ended. Gulf & Western Publishing had been ended to \$25 cm. ern dropped \$1/2 to \$36%.

Media General's A shares added \$21/4 to \$49. The company said it would examine a sweet ened \$70 a share offer by compa-nies controlled by investor Burt

The Bryan family, which holds a controlling interest in Media General's B shares, confirmed again its opposition to any sale of the company to Burt Sugarman.

Canada

IN LIGHT trading, the composite index fell 21.26 to 3,285.9. Among blue chips, Northern Telecom fell C3¼ to C322. Bell

Labatt lost C\$% to C\$22%, Molson A fell C\$1/2 to C\$231/2, while industrials Dofasco lost C\$1/2 to C\$29% and Imasco off C\$% to

Staley Continental added \$1/4 to ASIA

Nikkei falls 223 amid US interest rate uncertainty

Tokyo

UNCERTAINTY over US interest rate trends sent investors to the sidelines in Tokyo yesterday and share prices closed lower for the third consecutive session, writes Shigeo Nishiwaki of Jiji Press.

The Nikkei average fell 223.47

to 27.264.30 after moving between a high of 27,555.38 and a low of 27,261.61. Volume remained low at 620m shares compared with Friday's 745m. Losses led gains by 668 to 257, with 129 issues unchanged. Last week's news that the US

employment rate had fallen in April to a 14-year low of 5.4 per cent raised concern over a possible rekindling of inflation and higher interest rates. The US Treasury Department's

and bond auctions starting today also prompted institutional investors and business corporations to shy away from the mar-

Large-capital stocks fared poorly. Kobe Steel shed Y3 to Y352 on the day's most active trading of 58.69m shares, Mitsubi shi Heavy Industries fell Y8 to Y713 and Nippon Kokan Y5 to

High-technology issues came under small-lot selling pressure. Toshiba, which saw 14.68m shares traded, declined Y14 to Y853. Fujitsu lost Y60 to Y1,560, Matsushita Electric Industrial Y30 to Y2,700, NEC Y60 to Y2,120 and Toyota Motor Y50 to Y2,330. Pharmaceuticals also fell back on a wide front, with Takeda

Chemical losing Y30 to Y2,970. Against this bearish back-ground, individuals and some other investors sought issues with specific incentives to earn short-term capital gains.

Japan Steel Works was the second busiest issue with 23.45m shares changing hands; it surged Y32 to Y455 on investor expectations of plans to redevelop its plant site in Tokyo. Mitsubishi Steel and Niigata

Steven Butler on prospects for a key sector

keeps oils buoyant

reported by the US major oil companies recently are yet another reminder that weak crude prices are not always bad news for the world's oil

ing companies, in particular, were able to take advantage of the surplus of petroleum prod-ucts and crude oil in Europe, where the winter was exceptionally mild, to build up cheaper stocks and turn a nice

fited from the firming of oil prices in advance of last week's meeting of the Organi-sation of Petroleum Exporting

the good performance of the sector, particularly since the beginning of March, when oil prices began to firm from 16 onth lows, can continue Most of the gains of 1988 have already been achieved," says Mr Frank Knuttel of Pru Bache Securities in New York.

US performance has proved trongest, with the Standard &

buys internationally because of its extremely high yield at 8.4 per cent, combined with an which dominate the UK oils, are now a better buy than their US counterparts. This is only partially offset by UK excellent spread of downstream and upstream assets. Elf shares were hit badly in October when international investors withdrew from the market amid liquidity fears. In the US, Texaco and Chevron, the weakest of the majors, will continue to provide interesting situations as both are seen as vulnerable to predators. And while it is not clear who the potential hidders

economy weakens. This would make the oils a good defensive sector, but if world economic growth stays on course, as seems more likely now, most analysts believe the shares would

Much will hinge on the movement of oil prices. Despite some relatively bullish forecasts based on an expected increase in demand in the sec-ond half of 1988, most analysts

James Capel. "But then you'd have missed the next 50 per

cent price rise."
With sellers almost impossi-

ble to squeeze out of the wood-

work, analysts are universally reluctant to issue sell recom-

mendations even at inflated prices which would require strong oil prices in the next

decade to justify. Most reckon that Elf Aquitaine, the French oil group, paid well over the top in its recent £308m (\$573m)

purchase of oil assets from RTZ, but if Elf believes the

assets are worth that much, other potential predators could be willing to go the same dis-

believe oil prices in the range of \$20 per barrel are likely at best to be a temporary phe-

appear ready to prevent any sustained rise in oil prices the long-run competitiveness of their own oil reserves. Sec ond, the temptation to take advantage of high prices to past been too great for many Onec members. whose overproduction later leads to a colse in prices.

The sector has its interesting players, nevertheless. In the UK, takeover speculation surrounding the remaining independent exploration and production oil companies, including Enterprise Oil, Lasmo, Ultramar, and Clyde Petroleum, has been vigorous enough to liven up the oil index in the face of dull performances by Shell and BP, and has left many wondering whether these companies are not now absurdly overpriced.

"Any historical approach you take to the exploration and production sector says you 15 (after the bids for Britoil and Tricentrol)," says Mr David Grey, oil analyst at

losses in New York and Tokyo, and the steady dollar falled to draw investors. The Credit Suisse index eased 3.4 to 497.2.

Mr Tom Bannatyne, analyst at Warburg Securities, said people were waiting to bay but getting no encouragement. The market needs some positive sign from the banks on their investment rolley and their recommendation. policy and their recommendation on equities," he said. "Their enthusiasm for their own market

seems to be limited, and that's appeared to have little effect on the market.

Cars led equities down, with Daimler off DM18.30 at DM575.50, VW DM4.80 lower at DM235 and BMW DM10 weaker at DM495.

Bonds dropped in fairly thin trading, with the federal 6% per care 1000 federal federal

load factor rose to 66 per cent in March from 64 per cent a year earlier and revenues were up (per cent, saw its bearer shed SFr20 to SFr1,035.

BRUSSELS eased in thin trading, with news of the formation of a government failing to give the market any impetus. The cash market index fell 1631 to

After its astonishing 36 per cent rise in the first quarter and the absence of a major correction since, analysts feel that any good news on the corporate or political front is already reflected in prices. Besides, there is much ocal doomsaying about the new covernment's chances of success. Price movements were small, with oil group Petrofina easing BFr25 to BFr11,175.

AMSTERDAM remained in the doldrums, with little news toexcite trading, and the all-share R5 at R200. In diamonds, De trend index lost 0.9 to 83.8 in very Beers, which attracted interest low volume. Nedlloyd, recent tarand diamonds were also lower while industrials were neglected and shares drifted down in thin to close at R33.

Beers, which attracted interest low volume. Nedlloyd, recent target of takeover talk, shed a further F1 4 to F1 244.

Once you have read the rules you may need a little help

There are several weeklies that claim to serve brokers and financial advisers. Two of them are clad in pink. But only one is from the Financial Times.

It's called Financial Adviser. It covers the news that counts. The regulatory maze. The enormous range of products now available to investors - pensions, life assurance. unit trusts, investment trusts, and equity plans. Of course there are up to date statistics. Features to help you. Pointers to market trends.

Financial Adviser is there to help you.

The one in the pink from the FT.

I would like to receive a FREE copy of Financial Adviser Life assurance or Pensions Consultant. Stockbroker working for private clients.

Private portfolio manager. Accountant advising clients with investments. Solicitor or banker managing a trust.

Estate agent offering a wide range of mortgages. I am NOT a professional financial intermediary but I would like to receive a copy of Financial Adviser every week. I enclose a cheque for £30 (Overseas £50) made payable to FT Business Information Ltd for a year's
